Subject: Letter for energy committee for testimony

To the people elected to represent our state, cities, towns and communities,

My family lives in White River Township and has for almost 150 years. We are so disappointed to hear that there is legislation being considered that removes local site control. We are a township smaller than your average township. We have gathered and discussed what works for our township based on our size. We DID NOT SAY NO to solar. If we lose our voice, our community will be destroyed by solar companies not even in our state just for their own profit and the subsidies being offered. There are many ways to go green without destroying our beautiful state. Please remember our country was based on, "We the People," not, "We the government will tell you what's best." I remain hopeful that local communities can have a say in what happens to them.

Linda Cudney
Resident of White River Township
