

Hello my name is Tony Essenmacher and I support HB4080. Taking disabled people out hunting is something that I do. Having another tool in the box to help them out would be Awesome. A very good friend of mine (Joe) that I take out every year hunting just sent me a text, wanting to know if I know of anyone interested in buying his crossbow. He can no longer crank it back. This would give him (and many more people) a few more years to do what they love; enjoying the great outdoors in Michigan. Weapons for whitetail have evolved dramatically in the last few years We shouldn't have to constantly seek approval to use new technology. Make it happen. Fred Bear would approve.
