Highest in Wireless Network Quality Performance

Leading the industry in 4G and 5G wireless technology.

2.58 million sq mi

We have over 2.58 million square miles of 4G LTE coverage in the U.S. That's over 450,000 square miles more than the closest competition, which is an area about the size of California and Texas combined.

- Coverage 98% of the US population
- Network investment \$126B since 2000
- LTE network coverage 2.58M square miles

Network Investments in Michigan since 2015

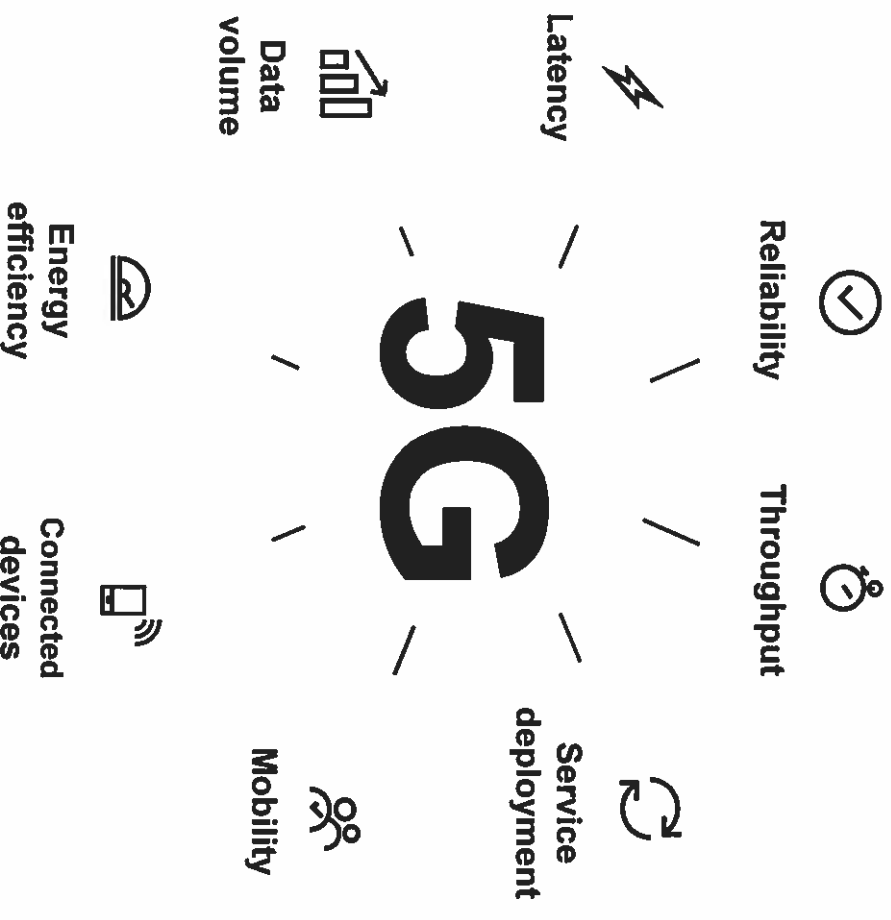

\$1.1B Network Investment

- 1,800+ combined new macro and small cell sites installed
- 1,700+ Carrier additions to increase capacity
- 600+ In-Building systems installed including:
 - Comerica Park
 - Ford Field
 - Little Caesars Arena
 - Michigan Stadium
 - Spartan Stadium

Verizon Ultra Wideband 5G

5G represents a massive upscale of network technology. It will provide data transfer rates many times faster than a blink of an eye, high bandwidth and greater opportunities for connectivity and reliability.

Verizon puts first responders first.

Service**

Our support for public safety continues with the launch of our dedicated Verizon Responder Private Core. We also offer priority access and preemption services at no additional cost. Verizon Response Ready solutions help first responders stay connected when it matters most.

Verizon Crisis Response Team (V-CRT)

- V-CRT supports first responders, government agencies, non-profit organizations and our customers during an emergency.
- V-CRT is staffed by personnel across the country who are trained in and often have previous experience with emergency response.
- V-CRT support includes:
 - Nationwide hotline answered 24/7
 - Loaner phones and data devices
 - Assistance with emergency wireless coverage
 - Emergency communication centers

Verizon Innovative Learning

Verizon is committed to programs that bring free technology, internet access, and innovative hands-on learning to students in underserved communities across the country.

Schools in Need

Our tech-based education program, targeting under-resourced middle schools, is improving students' math and reading scores.

Girls in Rural Communities

Through partnerships with rural community colleges, middle school girls receive year-round mentorship and participate in summer tech immersion programs.

Young Innovators

Verizon provides students access to engineering and design experiences, such as coding and robotics, through its Innovation Labs at middle schools, mobile buses, and retail stores.
