Subject: Don't Delay – It's time to hold DTE accountable. Call a hearing

You don't often get email from richardprochowski@yahoo.com. [Learn why this is important](#)

Dear Rep. Helena Scott,

I am Richard Prochowski, a Michigan resident. I'm emailing to let you know that it's time you hold DTE Energy accountable for their abject failure to provide an affordable, reliable grid.

DTE Energy is so used to not being held responsible for their lack of action - and to add insult to injury, they are offering only \$35 to people who have not had life-saving electricity after an ice storm for 96 hours. This comes days after they announced OVER \$1 BILLION in earnings this past year.

\$35 isn't enough to fill my gas tank, let alone compensate me for THEIR failure to prepare for storms like these!

And now they want more than \$600 million of Michigan resident's hard earned money through the largest requested rate increase in our State's history. More of MY money for what, the same song and dance that has clearly not been working? That's over \$1 BILLION in requested rate increases in the last year. It is time to stand by ratepayers, not shareholders. We demand answers!

I am asking you to call a hearing and hold DTE Energy accountable for refusing for years to take action.

A new report found that grid outages cost Michigan residents nearly \$3.5 billion in 2021. An unreliable grid is expensive, and Michiganders like me are ultimately footing the bill. Instead, localized resources like rooftop solar paired with batteries have reduced the frequency and severity of rolling blackouts across the country. That is what we need here in Michigan!

Thank you for standing up for my right to reliable and resilient energy,
Sincerely,

Thank you for standing up for my right to reliable and resilient energy,

Sincerely,
Richard Prochowski

Subject: Hold DTE and Consumer Power Accountable

Dear Rep. Helena Scott,

I am writing to voice my concern over our utilities failure to deliver on their responsibility to provide reliable and affordable energy to their customers, specifically DTE. Over the last week, an ice storm knocked out power to over 600,000 DTE and over 200,000 Consumers Energy ratepayers in Michigan. Almost a week later, tens of thousands are still without power. This is unacceptable and we as ratepayers deserve answers and action. We have repeatedly lost power (most recently prior to the Feb storm, in November 2022). DTE did make some adjustments in our equipment which resulted in a smaller group of us losing power (in the Royal Oak Section, near the Detroit Zoo). This smaller group size results in us being an even lower priority for assigning a work team from DTE.

For far too long, Michigan's utility companies have been charging astronomical rates while providing some of the most unreliable service in the nation with no repercussions or action from the Michigan legislature. It's left our communities without power or stuck struggling to pay the bills. It has created dangerous public health conditions where people are without power for more than three days in the cold and are not able to use the medicine and medical machines they need to survive. People have lost their groceries, and our children have not been able to go to school.

Meanwhile, DTE has filed for a record-breaking rate increase that could increase electric bills by almost 14%, threatening to make electric bills even more unaffordable.

That's why I am asking you to hold or request hearings in the legislatures energy committees as soon as possible to hold both DTE and Consumers accountable for the massive power outages throughout their service territories. At these hearings it is critical that lawmakers not only hear from the utilities, but hear from outside experts, advocacy groups, and impacted community members as well. Please address this as soon as possible and most definitely before winter 2024.

Sincerely,

Ms. Maryann Weingarden

You don't often get email from eadell421@gmail.com. [Learn why this is important](#)

Representative Scott,

I was pleased to see your statement in regard to the recent power outages. These all too frequent outages disproportionately impact low income communities of color. And climate change only makes our power system more vulnerable.

Thank you for your commitment to investigating the utilities and why this continues to happen. I ask that as the Chair of the House Energy Committee, you will hold hearings to gather information and solutions from the utilities, businesses, community groups, impacted constituents, and outside experts.

Sincerely,

Elizabeth Dell

[You don't often get email from tifanye28@everyactionadvocacy.com. Learn why this is important at <https://aka.ms/LearnAboutSenderIdentification>]

Dear Representative Helena Scott,

Each time the power goes out, our community takes a hit. We spend hundreds of dollars replacing spoiled food, and miss days of work or school. For elderly family members and neighbors, who are vulnerable to heat exposure, and for people with medical devices that require electricity, blackouts can be deadly. Nearly a million people in Michigan are without power today, with nighttime temperatures falling well below freezing in the coming days.

Meanwhile, our state's investor-owned monopoly utilities shovel profits to shareholders and evade accountability for the real costs of their failing infrastructure.

In short, hundreds of thousands of families are sitting in the cold without power again because DTE has prioritized shareholder profits over affordable, reliable electricity for customers. What's worse, DTE pours money into campaign donations and lobbying because it's paid off for them. More than 90 percent of state legislators took money from DTE in the 2022 election. They've effectively escaped accountability despite consistent public outrage at their awful service, long blackouts, and rising rates.

But it doesn't have to be this way. Michiganders shouldn't go days on end without power while nothing is done because we haven't mustered the political courage to stand up to an investor-owned utility bully.

That is why I am writing to encourage you to stand firmly in your values & show people whose side you're on. Customers deserve automatic, hourly compensation for hours in the dark – and utilities should not be able to raise rates to cover the costs of compensation if they perform worse than their peers in the industry.

We need reliable, affordable, people-centered energy that meets the needs of all Michiganders. When the power goes out, it's always an inconvenience, but for many it can have huge consequences for their health and finances.

Will you take action to reimburse customers who've been consistently failed by DTE, and take further action to hold DTE accountable for the damage they've caused our communities?

Thank you,

Sincerely,

Tifanye Williams

Subject: Hold DTE Energy accountable

[You don't often get email from karinam@everyactionadvocacy.com. Learn why this is important at <https://aka.ms/LearnAboutSenderIdentification>]

Dear Representative Helena Scott,

Every time there is a storm, power is lost along the 8mile strip through Detroit, Ferndale, and Oak Park, and REMAINS off for days at a time! So many accidents occur because of this, and so many people don't have access to external resources for habitable shelter. As a homeowner, I could use insurance, but renters are often struggling each time this happens. DTE should be doing everything in their power to prevent the ongoing outages, yet they refuse to fix low hanging lines and cut back trees that are growing over main power lines.

I recently learned that DTE wants to raise rates by \$622 million, the highest rate increase in state history. We already pay the highest rates paired with the worst reliability in the Midwest. We can't afford another rate increase, especially when DTE can't keep the power on as it is.

Over the past 12 months, DTE has tried to raise our rates by \$1 billion. Enough is enough. DTE is asking for more of our money and they aren't being made to improve their service. DTE must do better, and I ask that you hold them accountable.

Sincerely,
Karina McDonald

Representative Helena Scott,

I'm sitting in the dark for the second time within 1 week. I lost power on Wednesday the 22nd along with 800,000 other people in Michigan. My power wasn't restored until Monday of this week (after being given the run around out and multiple false restoration estimates). It is now Friday March 3rd and I am sitting in dark without power and heat AGAIN!! This is so far beyond unacceptable that I'm at loss for words. I can't ahold of anyone at DTE. I just get a recording. I just bought groceries today to replace what was spoiled in the last outage. DTE under it's current management has proven themselves incapable of maintaining a safe and reliable power grid for the residents of Michigan. I would urge the 90% (or more) lawmakers in Michigan to stop taking campaign donations from this company and actually hold them to account. The residents of Michigan pay some of the highest rates in the country and we deserve better than this! DTE's motivations are purely profit driven. They do not care at all about residents left without power, over and over and over again. This has to be stopped. The government's job to protect the from harm. DTE is doing great harm to the people of Michigan with their greed and negligence. What is going to be done to hold DTE accountable?

Hi Helena,

I recently became a constituent of yours when I moved to the Lincoln Manor neighborhood of Royal Oak last September. As I write this email I am sitting in my dark and cold home, enduring the SECOND power outage in two weeks. Last week, I was without power for 6 days, many of which dipped below freezing. I've had to throw away hundreds of dollars of groceries, been forced to eat out at restaurants for meals, and rely on the charity of friends and family to sleep in a warm bed. I watch my neighbors, some who are elderly and on fixed incomes, struggle with the hardship of living through a week of winter weather without power or heat. DTE is a public traded company. It seems that lately they are more accountable to their shareholders than to their customers. They pay out massive dividends while offering their customers an insulting \$35 for living without service for nearly a week.

We cannot go on like this. This level of service is unacceptable in a country as wealthy and technologically advanced as the United States of America.

I ask you, what are you going to do for your constituents to improve this situation? How are we going to hold DTE accountable to provide the critical services that we expect them to?

I look forward to hearing your response. Additional contact information for myself is provided below.

Dear Rep. Helena Scott,

I am Karen Anderson, a Michigan resident. I'm emailing to let you know that it's time you hold DTE Energy accountable for their abject failure to provide an affordable, reliable grid.

DTE Energy is so used to not being held responsible for their lack of action - and to add insult to injury, they are offering only \$35 to people who have not had life-saving electricity after an ice storm for 96 hours. This comes days after they announced OVER \$1 BILLION in earnings this past year.

\$35 isn't enough to fill my gas tank, let alone compensate me for THEIR failure to prepare for storms like these!

And now they want more than \$600 million of Michigan resident's hard earned money through the largest requested rate increase in our State's history. More of MY money for what, the same song and dance that has clearly not been working? ? That's over \$1 BILLION in requested rate increases in the last year. It is time to stand by ratepayers, not shareholders. We demand answers!

I am asking you to call a hearing and hold DTE Energy accountable for refusing for years to take action.

A new report found that grid outages cost Michigan residents nearly \$3.5 billion in 2021. An unreliable grid is expensive, and Michiganders like me are ultimately footing the bill. Instead, localized resources like rooftop solar paired with batteries have reduced the frequency and severity of rolling blackouts across the country. That is what we need here in Michigan!

Thank you for standing up for my right to reliable and resilient energy,
Sincerely,

Thank you for standing up for my right to reliable and resilient energy,

Sincerely,
Karen Anderson

From: koinophilia.llc@gmail.com@mg.gospringboard.io on behalf of Amanda Burgess <koinophilia.llc@gmail.com>
Sent: Saturday, March 4, 2023 10:47 AM
To: Rep. Helena Scott (District 7)
Subject: Hold DTE accountable for outages

You don't often get email from koinophilia.llc@gmail.com. [Learn why this is important](#)

Dear Rep. Scott:

I am writing to express my concern regarding DTE Energy's failure to deliver on its responsibility to provide reliable, affordable, and clean energy to its customers. The recent power outages resulting from ice storms across the state left over 600,000 DTE customers without power, and many residents without electricity for consecutive days.

In the face of widespread power outages affecting DTE customers across the utility's service area, DTE is proposing record-breaking rate increases that threaten to raise energy bills for customers at a time when reliable service cannot be guaranteed. Many of these same customers are already struggling to make ends meet as the cost of living crisis continues to grow.

As your constituent, I urge you to hold hearings in the Senate and House energy committees to discuss rapid response for residents in need of relief and to evaluate solutions to better meet the needs of Michiganders, not the utility's bottom line. We cannot let DTE Energy continue to prioritize profits over the well-being of Michiganders.

Furthermore, I urge you to require utilities to compensate or refund customers more fairly for the harm caused by power outages and negligence on the part of the utility. DTE Energy's failures have resulted in significant harm to the people of Michigan, and the utility must be held accountable.

We need to ensure that our utilities are providing reliable, affordable, and sustainable energy to Michiganders. It's clear that this recent extreme weather will not be the last time that the reliability of our electric grid is tested, and the need for solutions that prioritize Michigan's wallets, health, and climate has never been greater. I urge you to take swift action to hold DTE Energy accountable and to protect the well-being of Michiganders.

Thank you for your attention to this critical issue.

Dear Rep. Scott:

I am writing to express my concern regarding DTE Energy's failure to deliver on its responsibility to provide reliable, affordable, and clean energy to its customers. The recent power outages resulting from ice storms across the state left over 600,000 DTE customers without power, and many residents without electricity for consecutive days.

In the face of widespread power outages affecting DTE customers across the utility's service area, DTE is proposing record-breaking rate increases that threaten to raise energy bills for customers at a time when reliable service cannot be guaranteed. Many of these same customers are already struggling to make ends meet as the cost of living crisis continues to grow.

As your constituent, I urge you to hold hearings in the Senate and House energy committees to discuss rapid response for residents in need of relief and to evaluate solutions to better meet the needs of Michiganders, not the utility's bottom line. We cannot let DTE Energy continue to prioritize profits over the well-being of Michiganders.

Furthermore, I urge you to require utilities to compensate or refund customers more fairly for the harm caused by power outages and negligence on the part of the utility. DTE Energy's failures have resulted in significant harm to the people of Michigan, and the utility must be held accountable.

We need to ensure that our utilities are providing reliable, affordable, and sustainable energy to Michiganders. It's clear that this recent extreme weather will not be the last time that the reliability of our electric grid is tested, and the need for solutions that prioritize Michigan's wallets, health, and climate has never been greater. I urge you to take swift action to hold DTE Energy accountable and to protect the well-being of Michiganders.

[You don't often get email from elleanderse@everyactionadvocacy.com. Learn why this is important at <https://aka.ms/LearnAboutSenderIdentification>]

Dear Representative Helena Scott,

I recently learned that DTE wants to raise rates by \$622 million, the highest rate increase in state history. We already pay the highest rates paired with the worst reliability in the Midwest. We can't afford another rate increase, especially when DTE can't keep the power on as it is.

Over the past 12 months, DTE has tried to raise our rates by \$1 billion. Enough is enough. DTE is asking for more of our money and they aren't being made to improve their service. DTE must do better, and I ask that you hold them accountable.

Enjoy that prerecorded message. I truly am half versed in the infrastructure issues in MI but at the end of the day reliable power is a basic necessity and both DTE and consumers have proven themselves to be more interested in profit than providing a service necessary for life. Force them to make changes to their operations and start answering to MI residents instead of shareholders.

Sincerely,
Ellen Andersen

Hi,

Can we get on with regulating monopolies such as DTE better? I'm pro competition with less government regulation, but in the case of utilities and no choice, I'd like to ask you to introduce legislation to ban political donations from monopolies and/or better regulate with performance metrics for the citizens mutual benefit.

Thank you,
Arvind Sapra

Hello

My name is Lynette Gleasure and I live at 2110 Rowland Ave, Royal Oak. For the second time in a week, I am without power for an extended period of time and once again there is no estimate from DTE on when the power will return.

Will any consequences, fines, improvements or responsibility be placed on DTE over this?

I've lived most of my life in the south and even in hurricane areas, power does not stay off this long. We need help and I'm hoping our elected leaders can do something here.

Thank you

Lynette Gleasure

Dear Representative Helena Scott,

This winter we have lost power twice. Once for 6 days in February after a light icing, and once at the beginning of March. We are still without power as I type. In the summers we are guaranteed to lose power at least twice in our neighborhood, if not more. We try to contact a real person and all we get is faulty reporting systems and an outage map that half the time shows us as still having power. We have no way to effectively communicate and get answers when we lose power.

I recently learned that DTE wants to raise rates by \$622 million, the highest rate increase in state history. We already pay the highest rates paired with the worst reliability in the Midwest. We can't afford another rate increase, especially when DTE can't keep the power on as it is.

Over the past 12 months, DTE has tried to raise our rates by \$1 billion. Enough is enough. DTE is asking for more of our money and they aren't being made to improve their service. DTE must do better, and I ask that you hold them accountable.
