

EGLE has talked about HD. resources & I can verify that there is a lack of resources at EGLE. At city of Warren's City Council mtg. last night we learned that our Water Dept. had to provide Spot Testing Kits to EGLE, as well as chemicals to preserve soil samples.

As I can't imagine that there will be a massive increase in funding made available to EGLE for the other 7,000 sites in Mich. that have hazardous chemicals, I would urge legislators to please, please, please focus on prevention!

If you don't have funds to clean up 7,000 sites you must ~~stop~~ ^{add more} stop giving so many warnings to these bad actors. Please provide the legal tools needed to shut down those violators after 2 warnings. A "3-strikes your out" rule, if you will. and to access their assets.
