I. Background and Qualifications

I am Dr. Daniel A. Smith, Professor and Chair of Political Science and University of Florida Research Professor (2010-2012). I received my Ph.D. in Political Science from the University of Wisconsin-Madison in 1994. For five academic years (2007-2011), I served as the Director of UF's Political Campaigning Program. I am also President of ElectionSmith, Inc., a political consulting firm based in Gainesville, FL, specializing in empirical research on electoral processes in the American states. For more than two decades I have conducted research on electoral politics in the American states, focusing on the effect of political institutions on political behavior. I have written extensively on electoral process in the American states, publishing more than 80 articles and book chapters, including many that have appeared in the discipline's top peer-reviewed journals, such as the *American Political Science Review*. I have also published two academic books on politics in the American states, and I am the coauthor of a leading textbook, *State and Local Politics: Institutions and Reform*, 4th ed. (2015). I have taught a range of undergraduate and graduate courses on voting and elections in the American states. I am a former Senior Fulbright Scholar, the past-President of the State Politics and Policy Section of the American Political Science Association and have testified before the U.S. Senate and the Florida Legislature on voting and election issues. I have received numerous grants and awards for my work on campaigns and elections, including from the U.S. Department of State and the American Political Science Association.

II. Summary of Findings

There is strong empirical evidence in Michigan that a greater proportion of the approximately 18,000 valid Affidavit Ballots voted on Election Day in the 2016 General Election

were cast in precincts with high levels of African Americans as well as precincts with low median household incomes. Key findings include:

- About half of the more than 18,000 Affidavit Ballots were cast in precincts with a disproportionately African-American populations (from 20.5% to 100% African-American, with an average population that is 44.8% Black);
- Voters living in 100% African-American precincts were 16 times more likely to cast an Affidavit Ballot than voters living in precincts with no African Americans;
- Roughly half of the Affidavit Ballots were cast in precincts with a median household income of \$34,680 or less.

In my opinion, if signed into law, Senate Bills 303 and 304 (and related bills) will likely disenfranchise low-income and minority voters, as they disproportionately are more likely to reside in precincts with higher levels of voters who cast valid Affidavit Ballots.¹ Moreover, if Senate Bill 285—which I understand would impose photo identification requirements without an affidavit option for absentee voters—is signed into law, this will likely compound the impact of eliminating the Affidavit Ballot by removing another method for voters who lack qualifying photo identification to vote.

III. Casting of Affidavit Ballots by Voters Not in Possession of Picture Identification

In the state of Michigan, all registered voters must show a Michigan driver's license, a Michigan personal identification card, or some other acceptable form of picture identification before casting a ballot on Election Day.² However, under current law, a registered voter unable to produce a picture identification on Election Day may cast a regular ballot at his/her precinct after signing an affidavit attesting that he/she is not in possession of picture identification. I refer

¹ The methods used in conducting my statistical analysis are described in the attached Methods Appendix.

² See MCL 168.523 (voter identification requirement).

to these herein as Affidavit Ballots. Existing law will be altered with the passage of Senate Bills 303 and 304 by removing the Affidavit Ballot option..

Following the November 8, 2016 General Election, the Michigan Secretary of State made available a pdf summary sheet, entitled, “2016 November General Provisional Ballot / Not in Possession of ID Report by County.”³ The data included in the document include the number of Affidavit Ballots tabulated in each of the state’s 83 counties, which are further broken down by the number of Affidavit Ballots tabulated in each precinct for each home rule local jurisdiction (city or township).

In the November 8, 2016 General Election, according to the Michigan Secretary of State, over 18,388 legally registered voters in Michigan cast Affidavit Ballots out of the roughly 3.76 million votes cast on Election Day,⁴ or nearly 0.5% of all in-person ballots cast. There is considerable heterogeneity across the state’s 83 counties of Affidavit Ballots cast, both in terms of their total number and as a percentage of all ballots cast. In some counties (Otsego, Lake, Bay, Iron, Ontonagon, Montmorency, Ogemaw, Baraga), less than 0.01% of all ballots cast

³ “November 2016 Provisional Ballot / Not in Possession of ID Totals” (last updated Nov. 30, 2016) attached as **Exhibit A**. The affidavit report was updated in December 2017, with changes submitted by Clinton Township in Macomb County. The analysis in this report was originally conducted prior to the update so does not reflect the additional numbers from Clinton Township. The additions do not make a material change to the analysis as they account for only 192 additional submitted affidavits. The updated affidavit report is available from the Secretary of State at https://www.michigan.gov/documents/sos/nov_2016_final_no_ID_608840_7.pdf.

⁴ According to the Michigan Secretary of State, 4,874,619 votes were cast in the 2016 General Election. “2016 Michigan Election Voter Turnout,” (updated November 28, 2016, last visited May 24, 2021), https://mielections.us/election/results/2016GEN_CENR_TURNOUT.html. According to data compiled by the Associated Press and reported by Dr. Michael McDonald, 1,116,233 voters cast ballots prior to Election Day via absentee ballots. See “2016 November General Election Early Voting,” available at: http://www.electproject.org/early_2016 (last visited May 24, 2021). Thus, 3,758,386 ballots were cast on Election Day, and this is used as the denominator to calculate the percentage of Affidavit Ballots that were cast on November 8, 2016. http://www.electproject.org/early_2016.

(Election Day and absentee) were Affidavit Ballots. However, in other counties (Muskegon, Alger, Keweenaw, and Wayne), more than 0.5% of all ballots (Election Day and absentee) cast were Affidavit Ballots. In Wayne County, nearly 1% (7,258) of all ballots (Election Day and absentee) cast (788,459) were valid Affidavit Ballots cast by registered voters.

IV. Calculating Precinct-Level Racial and Household Income Data for Affidavit Ballots

In conducting this analysis, I did not have access to individual-level data for the more than 18,000 voters who cast Affidavit Ballots on Election Day. Drawing on publicly available data from the U.S. Census Bureau and data reported by local jurisdictions to the Michigan Secretary of State, however, it is possible to calculate estimates of the racial and economic characteristics of precincts in which Affidavit Ballots were cast on Election Day in the 2016 General Election.⁵

My analysis draws on publicly available data and uses GIS and standard statistical methods to place precinct-level Affidavit Ballots votes into 2015 block groups from the US Census' 5-year (2011-2015) American Community Survey (ACS), which can then be used to calculate preliminary Black population and median household income estimates across most

⁵ The header of the Secretary of State's document, "November 2016 Provisional Ballot / Not in Possession of ID Totals," (attached as **Exhibit A**), notes that there are some missing data ("in orange rows"), as some local jurisdictions evidently did not report information about the number of provisional affidavit ballots counted in some precincts, as well as a smattering of precincts in some townships that reported merged precinct results. In addition, a handful of Michigan's 1,521 cities and townships are excluded in the state's document. Finally, there are seven jurisdictions (City of Flint, City of Lansing, City of Grand Rapids, City of Sterling Heights, Waterford (Township), City of Ann Arbor, and City of Detroit) in the document that do not have the number of Affidavit Ballots voted broken down by precinct. As Michigan is a home rule state, local city and township clerks report the information regarding Affidavit Ballots to the Michigan Bureau of Elections. Public records requests were made to local jurisdictions that did not report Affidavit Ballots at the precinct-level to the Secretary of State, but precinct-level data were not received from Detroit, Flint, or Sterling Heights. In all, 94% (3,881 out of 4,141 precincts) are included in the racial minority analysis.

precincts. As I show, there is strong empirical evidence that a greater proportion Affidavit Ballots cast on Election Day in the 2016 General Election in Michigan were in precincts with high Black populations and also in precincts with the lowest median household incomes.

V. Affidavit Ballots Cast Disproportionately in Precincts with High Percentages of African Americans

Table 1 provides a count of 18,381 Affidavits Ballots (out of the 18,388 precincts reported by the Michigan Secretary of State) cast in the 2016 General Election across roughly 4,000 “precincts.” The precincts are ordered by their racial composition (percent Black population) and then clustered into quintiles by total population.⁶ In Table 1, each Group (quintile) have the same number of people; each comprises 20% of the state’s total population. The number of precincts in each cluster fluctuates due to the considerable variance in the number of people who reside within them, but each quintile has the same number of people (1.86 million), as estimated from the 5-year (2011-2015) ACS.

As Table 1 reveals, 9,020 of the 18,386 Affidavit Ballots voted in the 2016 General Election—that is, nearly 50%—were cast in Group 5 alone, the cluster of precincts with the most concentrated Black populations. Each of the 453 precincts in Group 5 has a population that is at least a fifth African American, ranging from 20.5% to 100% and averaging 44.8%—a disproportionately greater population of African Americans in each precinct compared to the rest

⁶ For purposes of this analysis, since I do not have the breakdown by precinct for the cities of Detroit, Flint, or Sterling Heights, the Affidavit Ballots cast in their jurisdiction are treated as being voted a single “precinct.” This undoubtedly produces a conservative bias in the estimates of the racial (and economic) distribution of Affidavit Ballots across Michigan’s precincts, as the 5,834 Affidavit Ballots cast in Detroit, a city that has 80% Black population, are represented in the analysis by a single “precinct.” Similarly, the 228 Affidavit Ballots cast in the City of Flint, which is estimated to have a 55% Black population, is coded as a single “precinct.” Sterling Heights, which is estimated to have a black population that is 5.5% Black, had 83 Affidavit Ballots, and is also coded as a single “precinct.”

of the precincts in the state (which average just 3.2% Black population). The total population of 1.86 million people and the 9,020 Affidavit Ballots in Group 5 amounts to a ratio of 206 people per Affidavit Ballot cast. In contrast, only 2,070 Affidavit Ballots were cast in the 1,052 precincts that comprise Group 1, all of which have populations that are less than 0.4% Black. Taken as a ratio of total population to Affidavit Ballots cast across these nearly homogeneous white precincts, the ratio increases four-fold, to 899 residents per Affidavit Ballot cast.

Group (Quintile)	Number of "Precincts"	Percent Black Population in Precincts (Range)	Number of Affidavit Ballots Voted	Percent of Total Affidavit Ballots Cast
1	1,052	0% - .39%	2,070	11.3%
2	893	.40 - 1.58%	2,220	12.1%
3	799	1.59% - 5.50%	2,169	11.8%
4	683	5.51% - 20.50%	2,902	15.8%
5	453	20.51% - 100.00%	9,020	49.1%
Grand Total	3,880		18,381	

Another way to think about the racial composition of precincts and the number of valid Affidavit Ballots cast is to consider those precincts that are homogeneous or nearly homogenous—that is they are populated completely (or nearly completely) of either Black or white individuals according to the 5-year 2011-2015 ACS.

According to preliminary estimates calculated from the US Census, 2,808 Black individuals reside in 3 precincts that are populated with at least 99% Black residents. Some 52 voters cast Affidavit Ballots across these three nearly all-Black precincts. A total of 2,819 people live in these nearly homogenous precincts, which amounts to 1 Affidavit Ballot voted for every 54 people living in the three precincts. In contrast, there are estimated to be 1,659 precincts that are nearly completely without African Americans, i.e., that are non-Black; that is, their populations are less than 0.1% Black. Across these precincts, that have a total population of 2.99

million people, 3,403 Affidavit Ballots were cast, meaning one Affidavit Ballot was cast for every 878 people living in the precincts. In short, voters living in the three nearly completely Black precincts in the 2016 General Election were 16 times more likely to cast an Affidavit Ballot than those living in 1,659 nearly completely non-Black precincts.

This analysis is bolstered by a recent study of Michigan’s affidavit ballots by Professor Marc Meredith of the University of Pennsylvania and his colleagues Michael Morse and Phoebe Henninger.⁷ Their thorough study estimates that minority voters in Michigan “are about five times more likely to lack access to ID than white voters.”⁸

VI. Affidavit Ballots Cast Disproportionately in Precincts with Low Median Household Incomes

Table 2 provides a count of the Affidavits Ballots cast across the “precincts” included in this analysis, with precincts clustered by household income.⁹ Here, the precincts are sorted (from low to high) into quintiles by the median household income of each precinct. The number of precincts in the five median household income clusters vary; however, each quintile in Table 2 comprises 20% of the state’s total households, or roughly 715,000 households each, as there are roughly 3.58 million households across the available precincts, according to estimates calculated from the 5-year (2011-2015) ACS.

⁷ Marc Meredith, Michael Morse, Phoebe Henninger, *Who Votes Without Identification? Using Individual-Level Administrative Data to Measure the Burden of Strict Voter Identification Laws* (Mar. 4, 2020), https://papers.ssrn.com/sol3/papers.cfm?abstract_id=3205769.

⁸ *Id.* at 3.

⁹ Along with the same caveats in the racial analysis for missing Affidavit Ballots obtained the Secretary of State summary document, there are 163 fewer “precincts” in this median household income analysis due to missing data from the ACS. Some census block group populations are so small that they might compromise the anonymity of those residing in those census block groups. Accordingly, this analysis of Affidavit Ballots cast by clusters of median household income analyzes 163 fewer Affidavit Ballots (18,218) than the racial minority analysis.

As Table 2 reveals, roughly 46% of the Affidavit Ballots cast (8,458 out of 18,218) across the five quintiles were cast in Group 1, a cluster of 521 precincts with a median household income of \$34,680 or less. Some 8,458 voters in these poorest precincts in the 2016 General Election cast Affidavit Ballots because they lacked a valid ID, or one voter for every 85 households in the 521 precincts. In contrast, only 2,263 Affidavit Ballots were cast across the 844 precincts in Group 5, all of which have a median household income of at least \$67,915. Only one voter out of every 316 households in these precincts cast an Affidavit Ballots, nearly four times fewer than those in the cluster with the poorest median household incomes.

Group (Quintile)	Number of "Precincts"	Median Household Income (Range)	Number of Affidavit Ballots Voted	Percent of Total Affidavit Ballots Cast
1 (Lowest)	521	\$10,184 - \$34,680	8,458	46.4%
2 (Lower Middle)	911	\$34,681 - \$44,848	2,671	14.7%
3 (Middle)	861	\$44,849 - \$55,045	2,398	13.2%
4 (Higher Middle)	722	\$55,046 - \$67,914	2,428	13.3%
5 (Highest)	844	\$67,915 - \$222,044	2,263	12.4%
Grand Total	3,859		18,218	

Finally, we can understand the disparity in Affidavit Ballots cast in the 2016 General Election by examining the difference between the precincts with the poorest and richest median household incomes. According to estimates calculated from the 5-year 2011-2015 ACS, there were four precincts with median household incomes of at least \$200,000; 13 voters from the 1,340 households in these four precincts cast Affidavit Ballots, or less than 1%. In contrast, 79 voters cast Affidavit Ballots in the eight precincts where the median household income was calculated to be less than \$15,000. There are a total 4,009 households in these eight precincts; the rate of Affidavit Ballots cast per household in these poorest districts is 5.9%.

VII. Conclusion

The foregoing analysis using public data and employing standard social science methods indicates that a higher rate of Affidavit Ballots cast on Election Day in the 2016 General Election in Michigan were in precincts with high Black populations and in precincts with low median household incomes. The findings provide strong empirical evidence that eliminating the right of voters to cast an Affidavit Ballot if they lack the possession of a valid ID will likely have a greater harm for Black and poorer voters. In my opinion, if Senate Bills 303 or 304 passes and is signed into law, it will likely disproportionately disenfranchise minority and low-income voters, as they are more likely to reside in precincts with higher levels of voters who cast valid Affidavit Ballots. The passage of Senate Bill 285 would likely worsen the disenfranchising effect of these bills as it would eliminate the opportunity to vote by absentee ballot without submitting a qualifying photo ID.

**METHODS APPENDIX FOR ANALYSIS OF EFFECTS OF MICHIGAN SENATE
BILLS 303/304 ON AFFIDAVIT BALLOTS CAST BY QUALIFIED VOTERS NOT IN
POSSESSION OF VALID ID IN THE 2016 GENERAL ELECTION**

Precinct geography for Michigan was downloaded (December 8, 2016) from http://gis.michigan.opendata.arcgis.com/datasets/8ce0f3ce3ff74109ac02a26d34a0f4fc_1. The map has roughly a dozen missing precincts. In cases where a single precinct was missing for a local jurisdiction, the hole was filled in and assumed to be the missing precinct; in cases where multiple precincts were missing, they, along with their affidavit ballot counts were merged. Precincts from the shapefile were then paired with the Affidavit Ballot counts for available precincts (or in a few cases, local jurisdictions).

The 2015 block group shapefile from the 2011-2015 5-year ACS was downloaded from the US Census, as well as the count of households for each block group, the median household income for each block group, and the black population for each block group. These data were loaded into the shapefile. The block group shapefile was then intersected with the shapefile of precincts that were matched to the Affidavit Ballot counts. There are 8,205 block groups (although some of these are water block groups and don't line up with any precinct), and 3,881 precincts with racial data (4,141 minus the 260 without data). Sometimes block groups fell whole within precincts, which allowed a clean count of households and population in that block group to be calculated. If a block group only partially fell within a precinct, areal interpolation was used to apportion households and population. The area of the block group in a precinct was divided by the total block group area (which is always less than or equal to 1), and then multiplied by the number of households or population in the block group, which was finally added that to the precinct.

To calculate median household income, for each block group the number of households estimated to fall within a precinct (sometimes whole, sometimes split) was multiplied by the median income for that block group. These portions were then summed across all the block

groups that fell within the precinct, then divided by the number of households that were calculated as being in the precinct.

In addition, the ACS doesn't report median income for a block group when they didn't get a good enough sample. In some cases, this is tiny or zero population block groups, but not always. Some 276 out of 8,205 block groups in Michigan had no reported median income in the 5-year (2011-2015) ACS, although roughly 2/3 had real populations. These block groups were excluded from the median income calculation for a precinct, but these block groups' household counts were retained for the next step. Two precincts (in East Lansing) had no block group portion with household data and were thus ignored.

To calculate income and black population quintiles, household income and percent black population were sorted from low to high. Columns, the cumulative count of estimated households as they have greater household income or as they have greater black population, were then created to calculate quintiles.
