Hello,  
Please accept this email as my 3 minutes of public comment for this committee.

I approve and support all four bills listed in the email broadcast about this meeting.

I especially endorse HB 5288 and HB 5268.

These are critical to stopping fraudulent absentee voting.

It would be in the best interest of the voting public if this committee would entertain a bill to disallow computerized voting immediately, and make it unlawful to revert back to computerized voting until such time as it's PROVEN to be unhackable. Contrary to media coverage, the population of this state KNOWS the November 3, 2020 vote "outcome" was not what legal voters cast their ballots for. It is the responsibility of this committee to enact legislation to give back voter confidence.

You might strongly consider supporting a Full Forensic Audit of even 3 key counties, though the whole state would be beneficial and educational. Your constituents are well aware full funding has been offered to Michigan to cover

the cost of ballot scanning by Jovan Pulitzer. There is no excuse to not at least begin with this step.

We await the execution of your constitutional duty.

Kristie Walls
