Dear Committee Clerk Melissa Sweet,

I am for massively lowering our carbon emissions, but this is not the way to do it--it will not work anywhere near fast enough, it will cost an inordinate amount and it will have major negative consequences. We don't need to waste more taxpayer money to tell us what we already know. We already know that nuclear power is not clean or renewable - it is dirty, slow, expensive, and harmful to people, land, water, and all beings along the fuel chain. We already know it is a FALSE solution that continues to place the burden of radioactive contamination in the backyards of our most vulnerable communities. It's a one way stream that only leads to highly radioactive waste with no long term solution. Nuclear power is not a part of the just climate future Michigan deserves.

I oppose HB 6019.

Section 2F contains language that would introduce harmful technologies known as false solutions that will continue to impact climate issues and humans negatively. It is an attempt to greenwash nuclear energy by utilizing dangerous demand mitigation strategies that would enable a renewable driven baseload capacity.

The nuclear industry is understandably seeking to perpetuate itself, but this is not a solution to the problems we face. Every nuclear power reactor dumps radioactive water, scatters radioactive particles, and disperses radioactive gases as part of its routine, everyday operation. It doesn't take an accident. Federal regulations permit these radioactive releases.

I urge you to carefully consider the potentially disastrous impact of this bill and oppose HB 6019.

Sincerely,
Jan Wright
6312 Harlequin Ln Ypsilanti, MI 48197-8733 janwrigh@umich.edu

Every nuclear power reactor dumps radioactive water, scatters radioactive particles, and disperses radioactive gases as part of its routine, everyday operation. It doesn't take an accident. Federal regulations permit these radioactive releases.

We need safe, pollution-free energy. We can do better than 50% resolution of renewables by 2030 - not more highly radioactive waste on our great lakes shores, we can do more, faster. Renewable is doable.

Any study should have community involvement and implementation lead by affected and frontline communities.

I urge you to carefully consider the potentially disastrous impact of this bill and oppose HB 6019.

Sincerely,
Jeannine LaPrad

Nuclear energy is a false solution, is heavy with carbon emissions as well as harmful nuclear emissions. Nuclear power is not clean energy. Destruction of land, harm to communities, and perpetual risk of exposure to radiation are elements of dirty energy. We need to move to renewable energy from solar, wind, geothermal, and water, now. Time is running out in our climate emergency . Please be responsible and vote NO on HB 6019.

Sincerely,
Rita Mitchell
