

**Michigan Association of  
Secondary School Principals**

**To:** Chair Hornberger and Members of the House Education Committee  
**From:** Michigan Association of Secondary School Principals,  
Michigan Association of Superintendents and Administrators  
**Date:** December 7, 2021  
**Re:** Opposition to HB 4970

---

We are writing to express our concerns regarding HB 4970 and the impact this additional mandate would have on our local school districts and staff.

For schools, providing students with a healthy and safe learning environment is paramount. Providing school personnel with appropriate training is one part of that, but it is not a solution in itself. Assessment, planning, development of protocols, and evaluation are also key components in ensuring that a student's education will not be disrupted by any safety concerns. Most importantly, schools need sufficient staff – including, in this case, school-based health professionals – to respond to the many different types of emergencies that might arise in a school building.

This is not to minimize the importance of seizure awareness and response training, but to put it in context with the many other emergency preparedness requirements imposed on schools and the many other critical components that need to go into an effective emergency response strategy.

To provide you with some context for considering this bill, we have attached the [Guide To Compliance Training for Michigan School Employees](#) prepared by the Michigan School Business Officials in collaboration with SET SEG Insurance that breaks down the many existing training requirements imposed on school officials in addition to their other professional development requirements.

From bullying and disaster management to child abuse identification and concussion awareness, each of the topics covered are important. Some are indispensable. Most of these requirements were put in place to try to protect students. Taken together, though, they mean that we are asking educators to not just be experts in pedagogy and their subject matter, but also to take on the duties of first responders, medical experts, mental health professionals, communications specialists, and lawyers. It is small wonder that Michigan schools are facing a staffing crisis.

We would urge you to reconsider the approach taken in HB 4970 and ask the following questions: Does every staff member in a district need to be trained, or could this more appropriately be targeted? Is biennial retraining truly necessary? Could existing requirements be reduced so we are not just layering on additional mandates? How will these new planning requirements fit into the overall emergency response plans that all schools are required to develop? What resources might the state provide to ensure that trained medical professionals, like school nurses, are available to respond to students' health needs rather than imposing these requirements solely on educators?

Without significant changes, we must urge you to oppose this new mandate on schools.

*This document provides information of a general nature regarding legislative and regulatory developments. It is not intended to be fully comprehensive, nor to provide legal advice or opinions relative to specific facts, matters, situations or issues. Future legal, legislative, or regulatory developments may affect the subjects addressed.*

# How to Use this Guide

This guide is designed to help schools identify education and training that is required for Michigan schools. In the first section of this guide, training is organized by subject. In the second section, the training is broken out by employee groups. Both sections contain the following information:

- **Subject:** the topic addressed by the training. Policy courses, which are designed to satisfy implementation requirements for policies boards of education are required by law to adopt, are listed in red. Part of the compliance requirements for these courses includes employee review of the district's policies.
- **Governing reference:** the regulation or standard that outlines the training requirements. It is important to refer to the actual regulation/standard to ensure compliance with all requirements.
- **Training schedule:** the frequency with which the training needs to occur.
- **Personnel:** the employee(s) impacted by the training and/or exposed to specific hazards.
- **Training/SafeSchools:** the training resource is listed for your convenience. When available, the corresponding SafeSchools training class is listed. SafeSchools training data and management is a value-added benefit available to SET SEG members, but it should be evaluated and supplemented with district specific information when necessary to be compliant. If your district is not a member of SET SEG, you can purchase SafeSchools at a discounted price through MSBO.

At the end of this guide, you'll find a glossary of terms and a list of additional resources that can be helpful if you need to do further research about a particular subject or training requirement.

An electronic copy of this guide is available on the following Web sites:

- [www.setseg.org](http://www.setseg.org)
- [www.msbo.org](http://www.msbo.org)

## Important note:

The training outlined in this guide should always be evaluated and customized to fit each school district's needs and specific exposures. Be aware that certain topics and/or exposures may apply to different employee groups than the ones listed. If a district has an unusual exposure, additional training topics may be required as well.

# Compliance Training Listed by Subject

## School District Training/Education

Subject	Governing Reference	Training Schedule	Personnel	Training/SafeSchools
Asbestos Awareness	MIOSHA General Industry Health Standards Part 305	Initial/annual	Employees with occupational exposure	Asbestos Awareness K-12 Full 2 Hour (4 courses)  MIOSHA Consultative Services MIOSHA Consultative Services
Automotive Service Operation	MIOSHA General Industry Safety & Health Standards Part 72	Initial	Employees where vehicles or tire and wheel assemblies are serviced, repaired or salvaged	MIOSHA Consultative Services
Beginning School Bus Driver	MCL 257.1851	Initial, plus 6 CEUs within 2 years	Beginning bus drivers	Michigan Department of Education
Bloodborne Pathogens	MIOSHA General Industry Safety & Health Standards Part 554	Initial/annual	Category A employees	Bloodborne Pathogens Exposure Prevention (4 courses)  MIOSHA Bloodborne Infectious Diseases Online Training Program
Bullying/Cyber Bullying*	MCL 380.1310b PA 478	Initial/annual	Administrators, school employees and volunteers	Bullying: Recognition & Response (4 courses)
