Subject: 1.20.2022 10:30 am Oversight Committee meeting.

Hello,

Please read the following as my public comment, and make it part of the public record.

Given the auditor's report of inaccurate reporting of deaths in nursing homes, this committee should use the full extent of the law to hold Governor Whitmer responsible for both the illogical decision to place covid positive patients in nursing homes, as well as the criminally erroneous reporting of resulting deaths. She is responsible for the deaths of any and all patients exposed to covid due to her order.

Likewise, this committee should take into consideration Governor Whitmer practicing medicine without a license when she ordered both doctors and pharmacists which medications could be used, or not used, for which conditions. She does not hold a license to practice

medicine and yet she was and is mandating methods of treatment.

It will prove out that Covid was not the "big killer of 2020 and 2021", but the treatment protocol is what caused deaths. Lack of treatment and improper treatment is what caused and is causing death. This needs investigation.

Respectfully,

Kristie Walls
