

April 17, 2019

Dear Members of Michigan House Communications and Technology Committee,

Andrews University supports the approval of HB 4249 because the legislation it rescinds and the associated rules created by the Michigan Public Service Commission are cumbersome to implement.

Andrews University supports the creation of E9-1-1 MLTS legislation and the associated rules that can be implemented based on currently available technology and best practices.

Sincerely,

A handwritten signature in black ink, consisting of a stylized 'D' followed by a large, loopy flourish.

Daniel L. Hamstra
Director of Telecommunications
