**To:** Molly Wingrove  
**Subject:** Wind and Solar not Market driven as investors flee.

Large multi-National wind & solar are pulling the plug on worldwide developments.  
Blaming the high investment costs due to unrestrained inflation.

EV producers have thrown in the towel as government subsidies failed to offset production  
and logistical costs.

Supply and demand folks that's the real governing factor.

William Pelak

Molly please add this letter to the 1011/01/2023 Energy Agenda meeting.
