To: Committee on Agriculture,

Today I am writing to show my opposition to the changes being brought forth in House Bill 5700. As an Aerial Applicator licensed in the state of Michigan, I would like to say that I am proud to be held to a higher standard than many other states. It is my opinion that it is in Michigan's best interest to have everyone working in this state to be held to the same standard and to not add the language exempting others from our standards.

Thank you for your consideration in this matter,  
Please feel free to contact me with any questions or concerns
