

HOUSE of REPRESENTATIVES

STATE OF MICHIGAN

Appropriations Requests for Legislatively Directed Spending Items

1. The sponsoring representative's first name:
Greg
2. The sponsoring representative's last name:
VanWoerkom
3. The cosponsoring representatives' names. All cosponsors must be listed. If none, please type 'n/a.' A signed letter from the sponsor approving the co-sponsorship and a signed letter from the member wishing to co-sponsor are required. Attach letters at question #9 below.
n/a
4. Name of the entity that the spending item is intended for:
Department of Lifelong Education, Advancement, and Potential
5. Physical address of the entity that the spending item is intended for:
105 W. Allegan Street Lansing, MI 48933
6. If there is not a specific recipient, the intended location of the project or activity:
n/a
7. Name of the representative and the district number where the legislatively directed spending item is located:
VanWoerkom, District 88. This program also services many other districts throughout the state. The hubs currently provide coverage to 59 of Michigan's 83 counties.
8. Purpose of the legislatively directed spending item. Please include how it provides a public benefit and why it is an appropriate use of taxpayer funding. Please also demonstrate that the item does not violate Article IV, S 30 of the Michigan Constitution.
Access to affordable, high-quality childcare continues to be a challenge for working families across Michigan. The MI Tri-Share program looks to address this by providing a unique cost-sharing approach for childcare that splits the cost among eligible employees, their employers, and the State of Michigan. The program is designed to benefit families by reducing the cost of childcare, benefit employers by aiding in employee retention and recruitment, and benefit childcare providers by increasing their financial stability. This

program is continuing to grow and is now being replicated and looked into by other states.

9. Attach documents here if needed:

Attachments added to the end of this file.

10. The amount of state funding requested for the legislatively directed spending item.

3400000

11. Has the legislatively directed spending item previously received any of the following types of funding? Check all that apply.

["State"]

12. Please select one of the following groups that describes the entity requesting the legislatively directed spending item:

State Department

13. For a non-profit organization, has the organization been operating within Michigan for the preceding 36 months?

Not applicable

14. For a non-profit organization, has the entity had a physical office within Michigan for the preceding 12 months?

Not applicable

15. For a non-profit organization, does the organization have a board of directors?

Not applicable

16. For a non-profit organization, list all the active members on the organization's board of directors and any other officers. If this question is not applicable, please type 'n/a.'

n/a

17. "I certify that neither the sponsoring representative nor the sponsoring representative's staff or immediate family has a direct or indirect pecuniary interest in the legislatively directed spending item."

Yes, this is correct

18. Anticipated start and end dates for the legislatively directed spending item:

n/a

19. "I hereby certify that all information provided in this request is true and accurate."

Yes

Executive Summary

Access to affordable, high-quality child care continues to be a challenge for working families across Michigan. The lack of affordable child care can force at least one parent to choose between working and not working. The MI Tri-Share program is a unique cost-sharing approach for child care that splits the cost among eligible employees, their employers, and the State of Michigan. The program is designed to benefit families by reducing the cost of child care, benefit employers by aiding in employee retention and recruitment, and benefit child care providers by increasing their financial stability.

To better understand how the program has benefited these groups, the Michigan Women's Commission (MWC) engaged Public Sector Consultants (PSC) to evaluate both the pilot phase of the program and the subsequent program expansion and scaling. Findings from the pilot evaluation informed the program's expansion and provided insight into participant experiences. The evaluation conducted during program expansion has further documented program successes and challenges from the perspective of each of the three participant types. Findings from the 2024 evaluation include:¹

- Program participation has grown nearly 100 percent over the past 16 months.
- Employers believe MI Tri-Share has helped with employee retention and that it will be useful for recruitment and retention in the future. Most feel their participation has made them more competitive.
- Many of the participating child care providers also offer the benefit to their employees. These providers were more likely to agree or strongly agree that participating in the program helped with recruitment and retention compared to providers who do not offer the benefit to their employees.
- Nearly all participating employees indicated the program had a positive impact on their family's financial security and stability.
- More than half of participating child care providers felt the program contributed to financial stability.
- Everyone agreed that the program's household income threshold limited participation in the program. Most expressed the need for a higher household income cap.

MI Tri-Share was successfully scaled through its expansion to additional facilitator hubs and the onboarding of a centralized statewide administrative partner, United Way of Northwest Michigan. The evaluation provides several recommendations for consideration as the program matures and participation continues to increase, including:

- Continue to build awareness of the program among all participant types, but particularly among employers.
- Consider aligning MI Tri-Share's facilitator hub service areas with existing business services or economic development regions in order to reach employers where they already meet to amplify program outreach and recruitment.
- Continue to explore new ways to increase program accessibility across demographics within target ALICE (asset limited, income constrained, employed) populations.
- Examine different levels of eligibility requirements and their impact on expanding access.
- Create a research agenda that provides for continuous program improvement, measures impact on participants, and documents lessons for the field that could lead to program replication.

¹ See Appendix A for more detailed summary of findings: MI Tri-Share 2024 Evaluation Key Findings.

Background

Access to high-quality and affordable child care remains a challenge for working families in Michigan. The cost of child care can be a significant barrier, one that often forces parents to choose between employment and caring for their children. Child care providers are also experiencing challenges with high operating and staffing costs, which create variable business operating conditions. Employers across the state continue to seek new ways to attract and retain workers as labor markets persist in supply shortages.

The MI Tri-Share Child Care Program is an innovative, first-of-its-kind approach to addressing families' challenges to affording child care. It uses a public-private cost-sharing model that reduces out-of-pocket child care costs for families and makes it easier for them to identify and secure licensed care. The program also seeks to increase labor market participation by allowing employers to offer a cost-sharing child care benefit to aid recruiting and retention efforts.

MI Tri-Share, which was created with bipartisan support in the 2021 state budget, began as a pilot program in three regions of the state.² Within these regions, facilitator hubs were selected, and the hubs defined the service areas for program participation. Since then, the program has received additional funding from the State, the W.K. Kellogg Foundation, and Ballmer Group to support continued growth and expansion into nine more facilitator hub service areas. At the time of this report, MI Tri-Share has 12 facilitator hubs serving 64 of Michigan's 83 counties and a statewide administrative partner that provides centralized administrative support to the facilitator hubs and helps to serve the remaining 19 counties, ensuring all counties in Michigan have access to the program.

In partnership with the MWC, PSC conducted a performance evaluation of the three pilot hubs in 2022. PSC then helped MWC develop a stakeholder-driven five-year strategic plan and prepare for the transition of program management to the Michigan Department of Lifelong Education, Advancement, and Potential (MiLEAP).³ As part of that strategic plan, in December 2023, MI Tri-Share began onboarding a statewide administrative partner to centralize payment processing, participant enrollment, and data collection. These functions were previously managed by each individual regional facilitator hub, which now can devote its capacity and attention to participant recruitment and outreach. With MWC and MiLEAP assistance, PSC conducted a process and outcome evaluation of all current hubs from December 2023 through June 2024 to assess program effectiveness before and after these changes.⁴

This evaluation report is divided into the following sections:

- Program overview
- Evaluation methodology
- Evaluation findings
- Conclusion and recommendations

² The pilot project shall consist of three designated regions approved by the Michigan Department of Labor and Economic Opportunity. One region must be located in a city with a population of between 38,000 and 39,000 and in a county with a population of between 172,000 and 173,000 according to the most recent federal decennial census, one region must be located in a rural region, and one region must be located in a suburban or urban region.

³ See Appendix B for the MI Tri-Share Strategic Plan.

⁴ See Appendix C for the data collection instruments used to evaluate MI Tri-Share.

Program Overview

Traditionally, the financial burden of child care has fallen solely on parents and caregivers, but MI Tri-Share represents a unique public-private cost-sharing approach to help more families afford licensed care. By evenly splitting the cost of care among three payers, as shown in Exhibit 1, eligible working families can reduce their costs and enter or remain in the workforce, which benefits everyone.

EXHIBIT 1. MI Tri-Share Funding Split

MI Tri-Share
CHILD CARE

Within this funding model, MI Tri-Share serves three core participants:⁵

- Working families (also referred to as employees)
- Employers
- Child care providers

These participant groups are the focus of the evaluation activities and findings in this report.

Objectives, Guiding Principles, and Strategic Directions

MI Tri-Share decision making is driven by objectives, guiding principles, and strategic directions. These elements all speak to the program's intended impact.

MI Tri-Share's **objectives** are to:

- Make licensed child care affordable and accessible for working parents by reducing out-of-pocket child care costs and alleviating the burden of finding child care
- Help employers retain and attract employees by removing child care affordability as a barrier to employment
- Support licensed child care provider stability and recruitment by helping to secure reliable payments

To pursue these objectives, the MWC used a set of **guiding principles** to foster pilot development and implementation. MI Tri-Share is designed to always ensure parent/guardian choice in licensed child care selection, prioritize reducing participants' administrative burdens, and target supports to working families in the ALICE population (PSC 2022).

⁵ While the State of Michigan is one of the three payers in the Tri-Share approach, it administers the program and is therefore not considered a participant for the purposes of this evaluation.

In 2023, following a yearlong stakeholder engagement project and concurrent with the pilot evaluation, MI Tri-Share adopted a five-year strategic plan, included as Appendix B, which featured the following **strategic directions**:

- Structure Tri-Share for scale
- Standardize and streamline administration
- Enhance and expand communications and engagement

Eligibility Requirements

Each participant type has different eligibility requirements. Employers must be located in or have an office located in Michigan. Working within the employer's budget and the employee eligibility requirements, employers have flexibility in deciding how many child care slots they can support and how the benefit will be offered to participating employees.

Possible ways employers made this determination included:

- Each participating employee receives one slot
- Participating employees receive multiple slots based on how many children need care
- Participating employees receive one or multiple slots based on financial need, seniority, or via lottery

There is no minimum or maximum number of employees who can participate per employer. Since employer contribution amounts are determined in part based on employee child care costs, there is no minimum financial contribution as long as the employer's payment represents at least one-third of at least one employee's child care costs.

Because MI Tri-Share is intended to support ALICE families, not all employees are eligible. To participate in MI Tri-Share, an employee must not be eligible for state's Child Development and Care (CDC) scholarship and should fall under MI Tri-Share's income range. Employers decide the number of child care slots and who gets them based on their budget. The original pilot required an employee's household income be between 150 percent and 225 percent of the federal poverty level (FPL). Eligibility criteria have been modified several times during the program to align with CDC program eligibility shifts. At the time of this report, MI Tri-Share accepts employees with household incomes between 200 percent and 325 percent of the FPL. Eligibility is reevaluated after two years of program participation.

Geographic Scope

MI Tri-Share covers 64 of the 83 counties in Michigan (Exhibit 2). Any interest or inquiries into the program coming from the 19 counties not yet covered by a regional hub are being serviced by United Way of Northwest Michigan as the statewide administrative partner.

EXHIBIT 2. MI Tri-Share Program Statewide Coverage

Source: MWC 2024

Evaluation data are from all 12 hubs (the three pilot sites as well as the nine expansion hubs), which are highlighted in Exhibit 3. During the evaluation period, the hubs provided service coverage to 59 of Michigan's 83 counties. Together, the facilitator hubs added five additional counties to their coverage areas in spring 2024.

EXHIBIT 3. MI Tri-Share Hub Location and Administrator

Counties Included	Hub Administrator
Original Hubs	
Lake, Mason, Muskegon, Newaygo, Oceana, and Ottawa	Goodwill Industries of West Michigan
Arenac, Bay, Clare, Gladwin, Gratiot, Isabella, Midland, and Saginaw	Saginaw Intermediate School District
Antrim, Benzie, Charlevoix, Emmet, Grand Traverse, Kalkaska, Manistee, Leelanau, Missaukee, and Wexford	United Way of Northwest Michigan
Expansion Hubs	
Calhoun	Calhoun Intermediate School District
Branch, Genesee, Hillsdale, Jackson, Lenawee, Livingston, Monroe, and Washtenaw	Child Care Network
Wayne	Everybody Ready
Alger, Baraga, Chippewa, Delta, Dickinson, Gogebic, Houghton, Iron, Keweenaw, Luce, Mackinac, Marquette, Menominee, Ontonagon, and Schoolcraft	Marquette-Alger Regional Educational Service Agency (RESA)
Otsego, Crawford, Montmorency, Ogemaw, Roscommon, and Oscoda	Otsego County Economic Alliance
Shiawassee	Shiawassee Regional Education Service District
Kalamazoo	Southwest Child Care Resources
St. Clair	St. Clair County RESA
Kent	Vibrant Futures

MI Tri-Share Pilot Evaluation Findings

The 2022 pilot evaluation produced several findings and actionable recommendations MWC and MiLEAP could use for program improvements. More detail on each of these can be found in the pilot evaluation report (PSC 2022).

Key Findings

- There was consistent growth in participation
- Direct outreach to employers was the most effective recruitment approach
- All participant types were highly satisfied with the program
- More than 80 percent of employees strongly agreed the program made child care more affordable and more than 80 percent also agreed the program helped them continue working in their current job
- Child care is a new benefit for most of the participating employers
- A majority of the participating employers agreed the program would help them retain employees in the future

MI Tri-Share Pilot Evaluation Recommendations

- Take further actions to increase the program's racial and ethnic diversity
- Consider providing more waivers or setting a variance to allow for some additional latitude in the household income limit
- Access statewide campaigns that could educate the public, employer networks, and child care providers about MI Tri-Share
- Ensure a balance between regional flexibility and administrative consistency
- Continue data collection for regular program evaluation
- Consider additional metrics, such as referrals to the federal child care scholarship, that could further the understanding of MI Tri-Share's impact
- Standardize elements of the communication, eligibility screening, application, and enrollment processes to further reduce hubs' administrative burden as the pilot shifts to a recurring program

In response to lessons learned from the pilot evaluation, MWC undertook a yearlong stakeholder engagement project to develop a five-year strategic plan for program improvement and expansion, included as Appendix B. Several program changes were subsequently made, including addressing program equity by expanding the geographic reach, instituting standardized administrative elements, centralizing the administrative function, and continuing to build statewide awareness and partnerships. Program improvements targeted at administrative functions were largely implemented after the evaluation period had ended, and as a result are not a subject of the 2024 evaluation activities other than to note their development.

2024 Evaluation Methodology

The 2024 MI Tri-Share program evaluation focused on the program’s expansion to the additional nine hubs, analyzed its performance before the transition to MiLEAP, and described the outcomes experienced by each participant type. The evaluation included both process and outcome assessments. Data were gathered through surveys and focus groups with each of the three participant types and monthly hub reports.

The 2024 evaluation will help MI Tri-Share develop and improve its program as it implements its five-year plan and transitions to a recurring statewide program.

Research Questions

The evaluation’s research questions focused on MI Tri-Share’s program processes, operations, and impact for each of the three program participant types. Exhibit 4 contains the research question list for both the process and outcome assessments as well as the data sources that informed each.

EXHIBIT 4. Evaluation Research Questions

Process Evaluation Research Questions	Data Sources
All Participant Types	
1. What are the social and economic characteristics of program participants?	<ul style="list-style-type: none">• Participant survey• Monthly hub data reports• Focus groups and/or interviews
2. What factors are driving and preventing program participation?	<ul style="list-style-type: none">• Participant survey• Monthly hub data reports• Focus groups and/or interviews
3. What are the most common ways participants are learning about MI Tri-Share?	<ul style="list-style-type: none">• Participant survey• Monthly hub data reports• Focus groups and/or interviews
Outcome Evaluation Research Questions	
Employees (Objective: Make Child Care Affordable and Accessible for Working Families)	
1. How has MI Tri-Share participation affected participant career trajectories?	<ul style="list-style-type: none">• Participant survey• Focus groups and/or interviews

6. Does the program change employer spending on employee child care?	<ul style="list-style-type: none"> • Participant survey • Focus groups and/or interviews
Providers (Objective: Help Child Care Providers Secure Slots)	
7. What is the program's impact on provider sustainability?	<ul style="list-style-type: none"> • Participant survey • Focus groups and/or interviews

Methods

PSC assessed program operations and participant demographics based on the information collected during the pilot evaluation of the three original hubs. Data collection activities included reviewing program documents, monthly reports, notes from previous interviews with hub coordinators, and other materials. Participant surveys and focus groups were also deployed and provided an opportunity to gather information about who is participating in the program, how they found out about it, and how they feel about the program's operations.

PSC collaborated with MWC to obtain data and participant contact information from hubs for survey and focus group recruitment. Most hubs shared this information with PSC, but one hub handled participant outreach on its own. PSC sent personalized survey links to most past and current participants; some hubs only sent contact information for participants they had prescreened as willing to participate. Employees and child care providers received \$10 gift cards for taking the survey and \$20 gift cards for participating in a focus group. Employers were not eligible to receive gift cards for participating in the survey or focus groups.

The outcome data analysis included data through December 2023, the last month before MI Tri-Share began onboarding a statewide administrative partner and transitioning from MWC to MiLEAP. The program's relatively small sample size and data quality issues with monthly hub data prevented extensive and statistically complex quantitative research method application, but a mixed-methods approach combining qualitative and quantitative data provided valuable insights into program strengths and opportunities for improvement. PSC employed descriptive statistics on these data when possible and analyzed qualitative data thematically.

2024 Evaluation Findings

This section presents the findings for the process and outcomes analyses. Each finding is followed by discussion of the supporting data. Process findings are presented first, including overall program participation, who participated, the primary limitations on participation, and how participants learned about the program. These are followed by findings from the outcomes analysis that covers outcomes for employees, employers, and child care providers including program impact on affordability and accessibility, recruitment and retention, and financial stability.

Process Findings

Finding One: MI Tri-Share Participation Continues to Grow

Participation from employers, employees, and providers nearly doubled on average between December 2022 and March 2024. The number of participants in all three types has increased every month since the beginning, as shown in Exhibit 5. During September and October 2023, hubs were transitioning to a shared set of data definitions resulting in incomplete data. Over the 16 months between December 2022 and March 2024, employer participation increased by 71 percent, child care provider participation increased by 80 percent, and the number of participating employees more than doubled, increasing 148 percent.

EXHIBIT 5. Monthly Participation by Participant Type

Source: Data provided by the MWC and analyzed by PSC

Finding Two: Participating Employees Were Likely College Educated

Exhibit 6 shows that almost three-quarters of employee survey respondents reported at least a college degree as their highest level of education completed. One-fifth of employee respondents reported having attained some college but without a degree completed. Six percent reported their highest level of education as high school diploma or GED, and 1 percent indicated that they had not yet attained a high school diploma.

EXHIBIT 6. MI Tri-Share Employee Highest Education Level Completed

N = 196

Finding Three: Participating Employees Were Slightly More Likely to Be White

MI Tri-Share is designed to support families with household income between 200 percent and 325 percent of the FPL, which puts the priority population firmly in the ALICE threshold. Data from the United Way's United for ALICE report provide a demographic profile of ALICE households in Michigan, which is useful for understanding how MI Tri-Share is reaching its intended audience. Based on employee survey responses, the program's expansion is apparently aligning MI Tri-Share more closely with the race and ethnicity of Michigan's ALICE households (Exhibit 7).

EXHIBIT 7. Race and Ethnicity of Employee Survey Respondents Compared to ALICE Households

N (Participating employees) = 204

N (ALICE households) = 1,292,690

Source: United for ALICE. "ALICE Demographics 2022." *United for ALICE*. <https://www.unitedforalice.org/demographics/michigan>

Finding Four: More than Half of Participating Employers Were Micro or Small Enterprises

The program had employers of all sizes, from small single proprietorships to large regional service organizations, as seen in Exhibit 8. Of the survey respondents, 55 percent said their business has between one and 49 employees. One-fifth of employer respondents reported having between 50 and 249 employees, and nearly one-fourth were large enterprises with 250 or more employees.

EXHIBIT 8: MI Tri-Share Employer Enterprise Size

N = 42

In open-ended survey responses and focus group discussion, medium and large enterprises expressed hesitation to join a program and offer an employment benefit when the program—and thus the benefit—might end. Since these data were collected, the program has undergone several structural changes, including its move to MiLEAP and the onboarding of the central administrative partner. Anecdotal data from ad hoc conversations suggest these fears have been somewhat alleviated as a result of these shifts and ongoing efforts to make the program permanent.

Data indicated that just under half of employers (44 percent) were in educational services, while 13 percent were in manufacturing and 11 percent in healthcare and social assistance. Employers from the construction industry made up 7 percent of the employers participating, with lesser representation from finance, hospitality, professional services, public administration, real estate, retail, and transportation. Many of the participating child care providers also participated as employers who provided the benefit to their employees.⁶

Finding Five: Employee Participation Was Limited by the Number of Participating Employers

Several factors limited program participation for each of the three participant types. As seen in Exhibit 9, when asked why they no longer participated in the program, employees said that it was because their children no longer needed paid care (36 percent), they changed jobs/companies and no longer received MI Tri-Share as a benefit (32 percent), or they no longer qualified for the program (18 percent). Other limitations on participation that were shared included children entering kindergarten, a participating child care provider closure, and moving out of state.

EXHIBIT 9. Reasons Employees No Longer Participate in MI Tri-Share

N = 22

⁶ Child care providers are counted as educational services. Of the 20 educational services providers that responded, 16 (80 percent) are early child care providers.

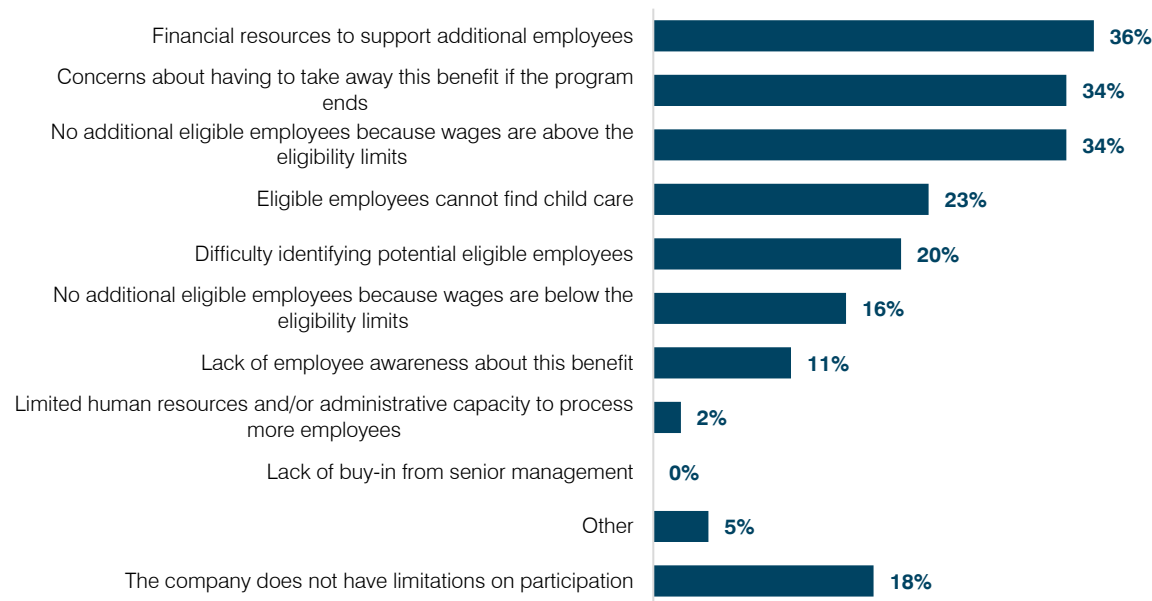

Finding Six: Employer Participation Was Limited by Financial Resources, Concerns the Program Would End, and Employee Eligibility

The median number of program slots offered by employers was eight and the median number filled by employers was two. When asked how they determined how many slots to provide, employers shared that their determinations were based on criteria such as:

- Employer internal financial resources/budget
- Employee interest/need
- Number of employees

When asked about what might limit the number of program slots offered, employers cited financial resources to support additional employees (36 percent), having no additional eligible employees (34 percent), and concerns about the program ending (34 percent) as the main reasons there would be limitations on the number of slots they support. As shown in Exhibit 10, nearly one-fourth of employers cited issues with eligible employees not being able to find licensed child care. One in five employers (20 percent) were challenged in identifying eligible employees, and a similar proportion (18 percent) indicated they had no limitations on the number of child care slots at all. Very few employers (2 percent) cited limited administrative capacity as an issue.

EXHIBIT 10. Reasons Why Employers Might Limit the Number of MI Tri-Share Slots

N = 44

When asked what factors may increase the number of program slots offered, many employers talked about:

- Expanding income eligibility to include higher household incomes
- Increasing licensed child care options in their area
- Increasing awareness of and interest in the program
- The need to fill their existing slots first

Finding Seven: Child Care Provider Participation Was Limited by the Number of Eligible Children in Their Care

More than 50 percent of child care providers who reported not participating in the program said it was because they no longer have participating children in their care (Exhibit 11). A small portion (8 percent) indicated they stopped participating because they did not receive payments in a timely manner.⁷ Almost two-thirds of child care providers (62 percent) gave other reasons for not participating, chief among them was that employers no longer participated or that the employee had switched to a nonparticipating employer.

EXHIBIT 11. Reasons Child Care Providers No Longer Participate in MI Tri-Share

N = 13

Finding Eight: All Participant Groups Identified the Household Income Eligibility Threshold as a Universal Barrier to Family Participation

The program's income eligibility requirement is a major barrier for employees, employers, and child care providers who want to participate. In focus group discussions, child care providers expressed that they wanted to expand the program to reach middle- and high-income families and involve their own employees in it. Employers discovered that many employees are excluded from the program because the program's income threshold is based on household income, not individual income. Employers only know an employee's income, not that of their household. Employers also noted the threshold could be problematic for employees who advance in their careers.

⁷ The implementation of a statewide administrative partner is intended to address the timeliness of payments by eliminating wait times for payments to providers to be processed.

“With climbing wages in our company, several might not qualify for this great benefit due to the income constraint.” —Participating employer

Many participating employees reported the household income threshold to be a barrier to entry for their coworkers and friends. They also shared their employers’ concerns that promotions and career advancement would render them ineligible for the benefit.

Finding Nine: Employees Overwhelmingly Found the Program through Their Employer

Eight of ten (83 percent) employees reported they learned about the program through their employer. As shown in Exhibit 12, a small percentage (8 percent) of employees learned of the program through their child care provider. Fewer reported hearing about the program through social media (2 percent), colleagues (2 percent), MI Tri-Share hub staff (2 percent), and the news (1 percent). Among the other sources of information about MI Tri-Share, employees listed friends, general internet searching, and radio interviews.

EXHIBIT 12. How Employees Learned About MI Tri-Share

N = 194

Finding Ten: Direct Outreach from Hub Staff to Employers Remains the Most Common and Effective Method to Engage Employers

Recruiting employers to participate in MI Tri-Share is perhaps the most challenging aspect of the program. To ensure that more child care needs are supported by employers, a great deal of effort has gone into employer outreach, education, and recruitment. Data from the survey of participating employers indicate that the most common way employers learned about the program was by direct outreach from MI Tri-Share hub staff (26 percent). Using the Employer Resource Network to engage MI Tri-Share was the next most common (21 percent) for employers to learn about the program. Sixteen percent of employers heard about MI Tri-Share from their employees, and as shown in Exhibit 13, even fewer learned of the program through the news (7 percent), from other employers (5 percent), or from their local chamber (5 percent). Other sources of information provided in the survey responses included Great Start, Michigan Works!, and the Michigan Department of Licensing and Regulatory Affairs. Feedback from employers

suggests that the program may have greater success with employer engagement if MI Tri-Share’s facilitator hub service areas were more closely aligned with existing regions where businesses already meet and learn about opportunities together, such as Michigan’s Prosperity Regions or MiLEAP’s new Regional Child Care Coalitions boundaries which are developed and managed in partnership with local economic development organizations.

EXHIBIT 13. How Employers Learn About MI Tri-Share

N = 43

Employee Outcomes

Employee Outcome One: Families Reported Increased Financial Stability and Security

The MI Tri-Share model aims to reduce families’ child care costs and improve their financial stability (ability to pay the bills every month on time) and financial security (ability to pay all bills and set aside for emergencies and retirement without concern). Employees provided many examples of how the program helped improve their family’s financial stability primarily by allowing the savings to offset the costs of other essentials such as groceries, home maintenance, and child necessities, and 98 percent reported a positive impact on their financial stability because of the program.

“It’s a HUGE benefit that I am so grateful for. With rising costs of rent/mortgage payments, it allowed us to be able to keep a roof over our heads by cutting down daycare costs.” —Employee participant

Participating employees also praised the program for increasing their family’s financial security, and 97 percent agreed the program increased financial security. The additional funds helped alleviate the need to use savings or juggle bills to pay for child care.

“This helps us worry less about child care and allows us to know we have money for things like groceries and gas.” —Employee participant

Employee Outcome Two: MI Tri-Share Increased the Likelihood of Employees Staying in the Workforce with Their Employer

More than eight out of ten employees strongly agreed that the program made it more likely they would keep working and stay in their current job. As shown in Exhibit 14, 99 percent of the employees were in agreement that the program made licensed child care more affordable, and 97 percent found the enrollment process to be easy for them. There was only slightly less agreement that the program helped employees achieve their career goals, with 81 percent agreeing or strongly agreeing, and that the program made it easier to find licensed child care (70 percent).

EXHIBIT 14. MI Tri-Share Impact on Employees

N varies between 195 and 196 for each statement.

Employee Outcome Three: High Satisfaction with Program Enrollment, Eligibility Screening, Staff, and the Program Overall

There was a very high level of satisfaction with MI Tri-Share among employees. Exhibit 15 shows that nearly all (99 percent) stated they were satisfied or very satisfied with the program overall and 95 percent were satisfied or very satisfied with hub staff. In addition, program enrollment and eligibility screening both received 97 percent satisfaction from employees.

Most employees (92 percent) had not received employer support for child care expenses prior to the program, and 93 percent had not previously participated in the CDC program.

EXHIBIT 15. Employee Program Satisfaction

N varies between 195 and 196 between each statement.

Many employees also shared that participating in the program enabled them to maintain their employment and even pursue additional opportunities.

“This program has allowed me to continue to work, which provides food, shelter, and an education for my child, as well as other basic needs such as clothing, continuing my education in college, and overall wellness.” —Participating employee

Employer Outcomes

Employer Outcome One: Tri-Share Increased Employer Labor Market Competitiveness and Employee Recruitment and Retention

Overall, employers agreed that the program has helped with retaining existing employees and recruiting new employees. As shown in Exhibit 16, nearly three-quarters (71 percent) of employers agreed that MI Tri-Share had helped retain the employees who had participated, and even more (80 percent) agreed that MI Tri-Share would be an effective retention tool in the future. As expected, while there was not a lot of agreement that the program had helped employers recruit any new employees (38 percent), there was a much more positive outlook on the future of MI Tri-Share as a recruitment tool, with almost three-quarters (74 percent) in agreement. Almost two-thirds of employers (64 percent) agreed that offering MI Tri-Share as an employment benefit made their companies more competitive.

EXHIBIT 16. Employer Perceptions of Program Participation on Recruitment and Retention Efforts

N = 45

Employer Outcome Two: High Satisfaction with the Program

Employers were highly satisfied or very satisfied with MI Tri-Share hub staff, program enrollment, eligibility screening, and the program overall. Exhibit 17 shows that employers exhibited the highest level of satisfaction (96 percent) with hub staff, and more than nine-tenths of employers (93 percent) were satisfied or very satisfied with their experience with the program overall. More than 80 percent of employers were satisfied or very satisfied with program eligibility screening (87 percent) and program enrollment (82 percent).

EXHIBIT 17. Employer Program Satisfaction

N = 45

Employers stated in open-ended responses that the program was good for their communities and employees, easy to participate in, and that they want to offer it more widely. The most common areas where employers saw opportunity for improvements were to increase the household income eligibility threshold, create more awareness about the program among employees, and get more employers to participate.

“The Tri-Share program is simply excellent ... and is arguably the most important benefit outside of health insurance that I offer.” —Participating employer

Child Care Provider Outcomes

Provider Outcome One: The Program Improved Financial Stability for a Majority of Providers

On average, providers had three children enrolled in MI Tri-Share in their care. While most providers agreed or strongly agreed that program participation improved their financial stability (57 percent), 60 percent of providers stated they were neutral about whether serving MI Tri-Share participants improved staffing recruitment and retention (Exhibit 18).⁸ However, as noted above, there are providers who have chosen to also engage as employers by offering the program to their own employees. These providers were more likely to agree or strongly agree that participating in the program helped with recruitment and retention.

EXHIBIT 18. MI Tri-Share Impact on Participating Child Care Providers

N = 94

Most child care providers were satisfied or very satisfied with hub staff, program enrollment, eligibility screening, and the program overall. As shown in Exhibit 19, most MI Tri-Share child care providers were

⁸ In the survey, many child care providers indicated that they already provide child care benefits to employees such as offering full or partial discounts, which may contribute to feeling neutral about the isolated impacts of MI Tri-Share specifically on staff recruitment and retention.

very satisfied or satisfied with hub staff (90 percent). Nearly nine out of 10 (89 percent) of child care providers were very satisfied or satisfied with the program overall. Satisfaction with program enrollment and eligibility screening was only slightly lower, with 76 percent and 72 percent satisfied, respectively.

EXHIBIT 19. MI Tri-Share Child Care Provider Satisfaction

N = 94

When asked if there were ways the program could be improved, participating child care providers mentioned things like increasing employer participation, improving paperwork processes, and creating broader access to the program. Even with the benefits of MI Tri-Share, providers described the broader need for additional funding assistance for increasing staff, purchasing additional equipment, making facility improvements, staff trainings, and improving overall care.

2024 Conclusions and Recommendations

Since its initial pilot, MI Tri-Share has begun to successfully scale, growing program availability and participation by almost 100 percent in the 16 months from December 2022 through March 2024. The program has received praise and high levels of satisfaction from all participant types for reducing the burden of child care costs for working Michigan families. Employees noted the program's importance in helping them maintain employment, and employers identified the potential for the program to serve as a recruitment and retention tool. As the MI Tri-Share program continues to grow and expand to serve more employers and employees and their families, there are several key areas where increased attention could improve desired outcomes.

- Continue efforts to **increase awareness** of the program statewide, regionally, and locally. It might be beneficial to conduct market research on program messaging that resonates with both employers and employees. It would also be useful to explore alternative avenues to direct marketing, possibly by working with business organizations or service providers like chambers of commerce, economic development organizations, and the Michigan Works! networks.

- Consider **redefining local facilitator hub service area boundaries to more closely align with existing regions** where employers already meet to share opportunities and networks. Working within existing business regions, such as Michigan's Prosperity Regions or MiLEAP's new Regional Child Care Coalition boundaries, in partnership with local economic development organizations, may help validate the program and amplify facilitator hub recruitment efforts.
- Explore additional avenues to **increase equitable program access**. Though there were marked improvements in increasing the racial and ethnic diversity of participants during the program's expansion, further efforts to increase participation from families across racial and ethnic demographics within the ALICE population would be beneficial.
- **Expand eligibility requirements** so more people can take advantage of the program. This was identified as a needed program improvement by all participant types. Increasing the household income threshold or switching to individual employee incomes carries equity concerns but may also help maintain the program as a recruiting and retention tool for employers as long-term employees receive promotions and/or increased compensation.
- Continue to **identify and address barriers to participation** by gathering regular feedback from program participants.
- Continue to **assess the regional hub service area model and centralized administrative function** for effectiveness and efficiency.
- Continue to **provide and develop operational guidance and marketing materials** to standardize communication and processes. For example, create an eligibility checklist that potential employee participants can reference when considering whether to apply for the program.
- Create **clear definitions and standards for data and data management** to support recordkeeping and future research.
- Further **develop a research agenda** to support budget discussions for fiscal year 2026 and for the fiscal year 2027 benchmark evaluation called for in the current five-year strategic plan. Such an agenda could include metrics to understand the program's impact, short-term research projects to assess effectiveness of program elements or operational changes, and research questions on program effectiveness and replicability.

Appendix A: MI Tri-Share 2024 Evaluation Key Findings

Key Findings from the 2024 Program Evaluation

Prepared for MI Tri-Share by
Public Sector Consultants (PSC)

How Has MI Tri-Share Grown?

Participation has grown almost 100 percent between employers, employees, and child care providers from December 2022 to March 2024.

EMPLOYERS

70.6%
increase

(119 to 203)

EMPLOYEES

147.7%
increase

(222 to 550)

CHILD CARE PROVIDERS

80.1%
increase

(206 to 371)

Source: Data provided by the
Michigan Women's Commission
and analyzed by PSC

How Does MI Tri-Share Impact Employer Staff Recruitment and Retention?

71%

of employees indicate the program has helped employee retention, and **80%** believe it will be helpful to retain employees in the future.

64%

of employers agree that MI Tri-Share makes them competitive against other employers.

38%

of employers say the program has helped recruit new employees, but **73%** believe it will be a helpful recruiting tool in the future

Bonus employer impact: Many participating child care providers not only enroll children in MI Tri-Share, but also provide the benefit to their employees.

MI Tri-Share Business Sizes

17%
Micro

(fewer than 10 employees)

38%
Small

(10–49 employees)

(250+ employees)

"The Tri-Share program is simply excellent...and is arguably the most important benefit outside of health insurance that I offer." –Employer

Source: PSC MI Tri-Share employer survey

How Does MI Tri-Share Impact Family Financial Stability?

Participating employees, employers, and the State of Michigan equally split the cost of child care, resulting in a **66 percent reduction in costs per enrolled child to participating families.**

97% of families said that participating in the program improved their financial stability.

"Before Tri-Share we considered one parent quitting their job because it just didn't make sense to pay one entire salary for child care."

"This program has allowed me to continue to work, which provides food, shelter, and an education for my child."

Many families shared that participating in the program has enabled them to maintain employment and even pursue additional opportunities

How Does MI Tri-Share Impact Child Care Businesses?

56% of child care providers said that Tri-Share participation improves their financial stability.

"We were able to get 100% tuition from a family that would have struggled financially to pay childcare tuition without it—in a dual-earning household."

What Limits Employer, Employee, and Child Care Provider Program Participation?

Employer Reasons

- Limited financial resources to support additional employees
- Concerns about the program ending
- No more eligible employees

Employee Reasons

- 36%** children no longer needed care
- 32%** changed jobs/companies
- 18%** no longer qualified for program

Child Care Provider Reasons

- 54%** no more program-enrolled children in their care
- 31%** employers no longer participate
- 8%** not receiving payments in a timely manner

All three participant groups cited the income eligibility threshold as a universal barrier. Most expressed need for a higher household income cap.

"Our company does not have any limitations on participation. However, that is not our problem. Our issue with lack of growth of the program is due to eligibility criteria. Most of our team members utilize family members as their main source of child care. Also, with climbing wages in our company, several might not qualify for this great benefit due to the income constraint." –Employer

Appendix B: MI Tri-Share Strategic Plan

MI Tri-Share

CHILD CARE

TRI-SHARE CHILD CARE PROGRAM

Tri-Share is the first child care program of its kind in the country. It divides the cost of child care among employers, employees, and the state. From its start in March 2021 with three pilot regions serving 18 counties, it has grown to 59 counties, including the City of Detroit. Due to its success and rapid growth, program leadership is laying the groundwork to serve more businesses, families, and child care providers statewide. From this strategic planning process, Tri-Share will establish the necessary infrastructure efficiently to meet its customer's needs.

FOR EMPLOYERS

Supporting this program for employees increases recruitment and retention efforts and eliminates or significantly reduces barriers to employment.

FOR FAMILIES

The availability of affordable child care can increase economic security, boost workforce participation, and sustain employment, especially for mothers.

FOR THE STATE

Helping families access child care strengthens the provider network through stable and consistent child care utilization, creating more jobs and workforce stability in Michigan.

**FUTURE
VISION**

TRI-SHARE IS COMMITTED TO:

- Helping working families access safe, affordable, and quality child care that meets their needs and enables them to remain in or enter the workforce.
- Empowering employers with an innovative and effective recruitment and retention tool that supports employees and their families.
- Supporting providers by diversifying funding sources, creating strategic business partnerships, and investing state funds into Michigan's child care system.

GROWTH PROJECTIONS

STRATEGIC DIRECTIONS

Three primary directions have been identified with eight objectives to guide the Tri-Share program to long-term success.

STRUCTURE TRI-SHARE FOR SCALE

- Secure a permanent location and team for Tri-Share
- Optimize Tri-Share organizational structure and roles for scale
- Align funding with program needs and priorities

STANDARDIZE AND STREAMLINE ADMINISTRATION

- Streamline and standardize payment processes and tools
- Centralize and simplify data collection and management
- Improve participant experience

ENHANCE AND EXPAND COMMUNICATIONS AND ENGAGEMENT

- Increase statewide awareness
- Continue regional participant recruitment

KEY BENCHMARKS

FY 2025

- Tri-Share operates with adequate staffing at a long-term location
- Tri-Share has developed and executed an annual statewide marketing and communications plan
- Tri-Share hubs, in collaboration with the state, lead regular local marketing and recruiting campaigns
- A centralized and internally transparent software platform is operational
- A competent, collaborative external partner manages all payment processes

FY 2027

- A multiyear evaluation documents improved experience for participants
- All partners efficiently perform duties that align with their skills and expertise

FY 2028

- Tri-Share serves 5,000 to 7,500 households across all 83 counties

Employee Survey

Current and Former Participants

February 2024

Survey Email Language

Subject Line: MI Tri-Share Child Care Program Evaluation Survey

Hello,

Our records indicate you are a current or former participant in the [MI Tri-Share Child Care Program](#) (Tri-Share), a program that splits up the cost for child care between an employee, an employer, and the State of Michigan.

Public Sector Consultants (PSC) is leading an evaluation of the program and has asked us to provide you with two opportunities to contribute to this study. Your participation in either of these options is voluntary and your responses will be anonymous, but we are asking you to consider:

- Completing this short survey, which closes on Friday, March 29th
 - You will receive a **\$10 online gift card** upon completion of this survey
- Participating in a 90-minute [virtual focus group](#)
 - You will receive **\$20 online gift card** upon conclusion of the focus group
 - The link above will allow you to select multiple dates when you are available and if you are selected, you will be sent registration information.

Thank you for your consideration and if you have any issues accessing the survey, please don't hesitate to contact Ben Fulton at bfulton@publicsectorconsultants.com.

Survey Introduction

Thank you for participating in the Michigan Tri-Share program evaluation!

Our records indicate you are a current or former participant in the [MI Tri-Share Child Care Program](#) (Tri-Share), a program that splits up the cost for child care between an employee, an employer, and the State of Michigan. We are reaching out to ask you to complete this survey, which will help us get valuable information in support of an evaluation of the program. You will also receive a \$10 online gift card upon completion. Your participation is voluntary and your responses will be anonymous. The survey should take about 15 minutes to complete.

Please provide the information below so that we can confirm that you are a participant of the program and send you the \$10 online gift card. If you prefer to receive a physical gift card, please call Ben Fulton at 517-331-9462 to provide a mailing address where the gift card can be sent.

Are you a current or former participant in Tri-Share?

- Yes, I am a current participant
- Yes, I am a former participant
- No [If No, skip to end of the survey]

[If Yes]:

- Name: [Text box]
- Email address: [Text box]

Survey Questions

Program Participation

1. How many children do you have in your household and what are their ages?
 - Number of children: [First column dropdown of 1, 2, 3, 4...10)
 - Age:[Second column drop down for age <1 through 18]
2. How many children in your household **receive or received care through the Tri-Share program** and what are their ages?
 - Number of children: [First column drop down of 1, 2, 3, 4...10)
 - Age: [Second column drop down for age <1 through 18]
3. How much did you pay for child care each month **before** participating in the Tri-Share program, and how much do or did you pay for child care each month **while** participating in the Tri-Share program?
 - **Before** participating in the Tri-Share program: [Text box]
 - **While** participating in the Tri-Share program: [Text box]
4. Has your participation in Tri-Share impacted your household's overall financial security?
 - Yes
 - No

[If Yes] How has the program impacted your household's financial situation?

 - [Text box]
5. Before participating in the Tri-Share program, was your employer paying some or all of your child care costs?
 - Yes
 - No

[If Yes] How much did your employer pay per month?

- [Text box]

6. Have you previously participated in the State of Michigan's Child Development and Care (CDC) program?

- Yes
- No

7. Please indicate your level of agreement with the following statements:

	Strongly Agree	Agree	Neither Agree nor Disagree	Disagree	Strongly Disagree
The Tri-Share program makes/made child care more affordable.					
The Tri-Share program makes/made it more likely that I will keep working.					
The Tri-Share program makes/made it more likely that I will stay in my current job.					
The Tri-Share program can/did help me achieve my career goals.					
The Tri-Share program makes/made it easier for me to find child care.					
The enrollment process for the Tri-Share program was easy.					

8. Did you have to change your child care provider because you were participating in the Tri-Share program?

- Yes
- No

[If Yes] Please explain how and/or why?

- [Text box]

9. Please rate your level of satisfaction with the following elements of the Tri-Share program:

	Very Satisfied	Satisfied	Neither Satisfied nor Unsatisfied	Unsatisfied	Very Unsatisfied
Tri-Share program staff					
Eligibility screening					
Program enrollment					
Tri-Share program overall					

10. [If Yes, I am a former participant] Why do you no longer participate in the Tri-Share program? Please select all that apply.

- My child(ren) no longer need paid care
- My employer no longer participates in the program
- I changed job/company, and my current employer does not participate in the program
- I no longer qualified for the program (e.g., my household income was above the eligibility threshold)
- Other, please describe: [Text box]

Demographics

11. What county do you live in?

- Drop down list

12. What is your age?

- [Text box]

13. What is your race? (Please select all that apply)

- White
- Black or African American
- American Indian or Alaska Native
- Asian
- Native Hawaiian or Other Pacific Islander
- Other, please describe: [Text box]
- Prefer not to answer

14. Are you Hispanic or Latino?

- Yes
- No
- Prefer not to answer

15. What is the highest degree or level of school you have completed?

- No schooling completed
- Some schooling completed, but no high school
- Some high school, but no high school diploma/GED
- High school diploma/GED
- Some college, but no degree
- College degree or certification (for example: associate's degree, bachelor's degree, graduate degree, technical certification)

16. How did you hear about the Tri-Share program?

- Direct outreach from Tri-Share program staff

- Employer
- Child care provider
- Colleague
- Social media (e.g., Facebook, Instagram, Twitter, etc.)
- News (online or traditional newspaper)
- Other, please describe: [Text box]

17. Please share any additional comments you have about Tri-Share or how the program could be improved.

- Text box

18. To gain additional information and insights about Tri-Share, there will be several virtual 90-minute focus groups in March. These focus groups will include four to six participants, who will each receive a \$20 gift card at the conclusion of the session. Would you be interested in participating in a focus group?

- Yes
- No

If Yes, redirect to a different page with the following language:

Thank you for your interest in participating in a focus group for the Tri-Share program evaluation! Please use the link below to sign up for a session.

Employer Survey

Current and Former Participants

February 2024

Survey Email Language

Subject Line: MI Tri-Share Child Care Program Evaluation Survey

Hello,

Public Sector Consultants (PSC) is leading an evaluation of the [MI Tri-Share Child Care Program](#) (Tri-Share) and has asked us to provide you with two opportunities to contribute to this study based on your current or past participation in the program. Your participation in either of these options is voluntary and your responses will be anonymous, but we are asking you to consider:

- Completing this short survey, which closes on **Friday, March 29th**
- Participating in a 90-minute [virtual focus group](#)
 - The link above will allow you to select multiple dates when you are available and if you are selected, you will be sent registration information.

Thank you for your consideration and if you have any issues accessing the survey, please don't hesitate to contact Ben Fulton at bfulton@publicsectorconsultants.com.

Survey Introduction

As a current or former participating company in the [MI Tri-Share Child Care Program](#) (Tri-Share), we are asking you to complete this survey. In doing so, you will be providing valuable information in support of an evaluation of the program. Your participation is voluntary and your responses will be anonymous. The survey should take about 15 minutes to complete. Please provide the information below so that we can confirm the company's participation in Tri-Share.

Is your company a current or former participant in Tri-Share?

- Yes, my company is a current participant
- Yes, my company is a former participant
- No, my company does not participate in the Tri-Share program [exit survey]

[If yes]:

- Company name: [Text box]
- Respondent name: [Text box]
- Respondent job title: [Text box]

- Respondent email address: [Text box]

Survey Questions

1. Please choose the best industry/sector that describes your company:
 - Agriculture, forestry, fishing, and hunting
 - Mining, quarrying, and oil and gas extraction
 - Utilities
 - Construction
 - Manufacturing
 - Wholesale trade
 - Retail trade
 - Transportation and warehousing
 - Information
 - Finance and insurance
 - Real estate and rental and leasing
 - Professional, scientific, and technical services
 - Management of companies and enterprises
 - Administrative and support and waste management and remediation services
 - Educational services
 - Healthcare and social assistance
 - Arts, entertainment, and recreation
 - Accommodation and food services
 - Other services (except public administration)
 - Public administration (not covered in economic census)
2. How many full-time employees does your company currently have?
 - [Text box]
1. How many Michigan locations does the company have?
 - [Text box]
2. How many locations are currently participating in Tri-Share?
 - [First column dropdown of 1,2, 3, 4...10]
 - [Second column drop down has a text box where they can enter the county for each office]
 - [Third dropdown asks for number of employees at each office]
3. How many program slots does or did the company offer for Tri-Share participation?
 - [Text box]
4. How many program slots are currently or were filled by eligible employees?

- [Text box]

5. How does or did the company determine the number of program slots to offer for Tri-Share participation? For example, based on the number of eligible employees or amount of financial resources dedicated to the program.

- [Text box]

6. To the best of your knowledge, did the company pay for any amount of employee child care costs in the five years before participating in Tri-Share?

- Yes
- No
- I don't know

[If Yes] Please describe the company's approach to paying for employee child care in more detail.

- [Text box]

7. Please rate your level of satisfaction with the following elements of the Tri-Share program:

	Very Satisfied	Satisfied	Neither Satisfied nor Unsatisfied	Unsatisfied	Very Unsatisfied
Tri-Share program staff					
Eligibility screening					
Program enrollment					
Tri-Share program overall					

8. Please indicate your level of agreement with the following statements:

	Strongly Agree	Agree	Neither Agree nor Disagree	Disagree	Strongly Disagree
The Tri-Share program has helped the company recruit new employees.					
The Tri-Share program has helped the company retain existing employees.					
I believe the Tri-Share program will help the company recruit new employees in the future.					
I believe the Tri-Share program will help the company retain existing employees in the future.					
Participating in the Tri-Share program made the company more competitive against other potential employers.					

9. What factors, if any, might limit the number of Tri-Share program slots your company provides or provided to employees? Please select all that apply.
- Financial resources to support additional employees
 - No additional eligible employees because wages are **above** the eligibility limits
 - No additional eligible employees because wages are **below** the eligibility limits
 - Concerns about having to take away this benefit if the program ends
 - Limited human resources and/or administrative capacity to process more employees
 - Lack of buy-in from senior management (executive director, board of directors, CEO, etc.)
 - Lack of employee awareness about this benefit
 - Difficulty identifying potential eligible employees
 - Eligible employees cannot find child care
 - Other 1, please describe: [Text box]
 - Other 2, please describe: [Text box]
 - The company does not have limitations on participation
10. What factors, in any, might increase or may have increased the number of Tri-Share program slots your company provides or provided to employees?
- [Text box]
11. Please provide any additional context you would like to share about any of the factors you have selected in the previous question.
- [Text box]
11. [If a former participant] Why does your company no longer participate in the Tri-Share program? Please select all that apply.
- Did not have enough eligible employees to participate
 - No longer had the financial resources to support the program
 - Did not have the administrative capacity to implement the program
 - Other, please describe: [Text box]
12. How did you hear about the Tri-Share program?
- Employee
 - Direct outreach from Tri-Share program staff
 - Local chamber of commerce
 - Employer Resource Network
 - Trade association
 - Another participating business
 - Social media (e.g., Facebook, Instagram, X, etc.)
 - News (online or traditional newspaper)
 - Other, please describe: [Text box]
13. Please share any additional comments you have about Tri-Share or how the program could be improved.

- Text box

14. To gain additional information and insights about Tri-Share, there will be several virtual 90-minute focus groups in March that will include four to six participants. Would you be interested in participating in a focus group?

- Yes
- No

If Yes, redirect to a different page with the following language:

Thank you for your consideration and if you have any issues accessing the survey, please don't hesitate to contact Ben Fulton at bfulton@publicsectorconsultants.com.

Survey Introduction

Thank you for your support of the [MI Tri-Share Child Care Program](#) (Tri-Share) and for your participation in this survey!

As a child care provider with clients who are currently or have previously been enrolled in the Tri-Share program, we are asking you to complete this survey. In doing so, you will be providing valuable information supporting an evaluation of the program. Your participation is voluntary and your responses will be anonymous. The survey should take about ten minutes to complete. Please provide the information below so that we can confirm that you are a participant of the program.

Are you a current or former participant in the Tri-Share program?

- Yes, I am a current participant
- Yes, I am a former participant
- No, I have not participated in the Tri-Share program [If no, exit survey]

[If yes]:

- Child care business name: [Text box]
- Respondent name: [Text box]
- Respondent job title: [Text box]
- Respondent email address: [Text box]

Survey Questions

1. What is your child care business type?
 - Home-based care
 - Center-based care
 - Other, please describe: [text box]
2. How many total children (Tri-Share and non-Tri-Share) are enrolled in your facility?
 - [Text box]
3. How many children in your facility are currently or were formerly enrolled in the Tri-Share program?
 - [Text box]
4. , How many children in your facility are currently enrolled with the support of a child care subsidy or other form of financial assistance that is not Tri-Share?
 - [Text box]
5. In general, what types of support could you use to improve the quality of child care you offer?
 - [Text box]
6. Please indicate your level of agreement with the following statements:

	Strongly Agree	Agree	Neither Agree nor Disagree	Disagree	Strongly Disagree
Serving Tri-Share participants improves/improved our financial stability.					
Serving Tri-Share participants improves/improved our staffing recruitment.					
Serving Tri-Share participants improves/improved our staffing retention.					

7. Please indicate your level of satisfaction with each of the following program elements:

	Very Satisfied	Satisfied	Neither Satisfied nor Unsatisfied	Unsatisfied	Very Unsatisfied
Tri-Share program staff					
Eligibility screening					
Program enrollment					
Tri-Share program overall					

8. [If former participant] Why do you no longer participate in the Tri-Share program as a child care provider? Please select all that apply.
- We no longer have children in our care that are active in the program
 - We no longer have the administrative capacity to participate in the program
 - We were not receiving payments from the employer and/or hub in a timely manner
 - Other, please describe: [Text box]
9. Please share any additional comments you have about Tri-Share or how the program could be improved.
- [Text box]
10. To gain additional information and insights about Tri-Share, there will be several virtual 90-minute focus groups in March. These focus groups will include four to six participants, who will each receive a \$20 gift card at the conclusion of the session. Would you be interested in participating in a focus group?
- Yes
 - No
