Genesee County Overdose and Social Disparities

Integrated Approaches to Substance Use & Mental Health in Genesee County

- Over the past 7 years, GFHCs MHSU Task Force has worked to develop and continuously evolve a strong Community-Wide Strategy to Address the Opioid Epidemic and Other Emerging Substance Use Trends, which serves as a multisector approach to prevent and reduce overdose among Flint & Genesee County residents.
- MH&SU Core Initiative Program Highlights:
 - Genesee County Quick Response Team (Community-based)
 - Opioid Overdose Recovery Program (Hospital-based)
 - R.I.S.E. (Reach, Inspire, Serve, Empower) Program (Jail-based)
- Collectively, these initiatives focus on expanding our efforts with harm reduction, recovery support, mental health access, and justice-involved support services.

Opioid Overdose Recovery Program

New Paths, Inc., based in Flint, Michigan, operates the Opioid Overdose Recovery Program (OORP), a 24/7 hospital-based initiative designed to support individuals who have experienced a drug overdose or are under the influence of substances.

Key Features of OORP:

- **Immediate Engagement:** The program deploys Peer Recovery Coaches and Care Coordinators to engage with individuals in hospital emergency rooms, medical clinics, and other community settings following an overdose incident.
- Holistic Support: These professionals assist individuals in connecting to services that address various social determinants of health, ensuring a comprehensive support system beyond immediate medical care
- **Community Referrals:** Referrals to the program are made by medical personnel within all three Genesee County hospital systems (Hurley, McLaren, and Ascension/Henry Ford)
- OORP annually serves an estimated 1,200 unique individuals

Genesee County Quick Response Team

Established in 2020, GCQRT is Genesee County's only 24/7 SUD Support Program

Peer Recovery Success

- Client transitioned from homelessness and chronic substance use into residential care, showing significant progress in recovery.
- Overdose survivor completed treatment, secured stable housing and employment, and became an NA sponsor.
- Client regained visitation rights with children, achieved sobriety, and advanced to a managerial role after overcoming legal and personal challenges.
- Supported a client through relapse to sustained AA participation and ongoing sobriety.
- Guided a hospital referral into treatment, where they now actively inspire and engage peers.
- Coordinated QRT transport from jail to treatment, ensuring immediate access to recovery resources and support for the client.

The Genesee County QRT dedicated to overdose supporting survivors by connecting them to harm reduction. treatment, and recovery resources. We work to reduce repeat overdoses, promote access to postoverdose care, address social determinants of health, and enhance community efforts to prevent overdose.

A PROGRAM OF THE GREATER FLINT HEALTH COALITION

Harm Reduction Distribution Outcomes:

Quarter One (Oct-Dec. 2024):

- 7,884 Naloxone kits
- 5,451 Fentanyl Testing Strips

<u>2024 Totals:</u>

- 27,295 Naloxone Kits
- 19,874 Fentanyl Test Strips

R.I.S.E. (Reach, Inspire, Serve, Empower)

- Established in 2021 in partnership with the Genesee County Sheriff's Office and community partners.
- Serves justice-involved individuals during incarceration and reentry.
- Wraparound supports include:
 - Peer recovery & MAT access
 - Mental health & substance use services
 - Parenting/family support
 - Social determinant navigation
- Over 800 individuals served in the past year.

R.I.S.E. QUARTERLY REPORT

The RLS.E. initiative works in partnership with the Genesee County Sheriff's Office I.G.N.I.T.E program to provide mental health, substance use, and health-related social needs support during incarceration and reentry. R.I.S.E. aims to reduce recidivism and improve health outcomes for individuals and families impacted by incarceration.

referrals to R.I.S.E. from January to March 2025.

MENTAL HEALTH SUPPORT

96 referrals include mental health support services.

PEER RECOVERY COACHING

PORT

153 referrals include Peer Recovery Coaching services.

59 referrals include parental and dependent support.

ARENTAL AND DEPENDENT

SOCIAL DETERMINANTS

HEALTH

- Behavioral health support services
- Health-related social needs case management for reentering individuals and their dependents
- Parenting and visitation support services

Upon Returning Home

- Peer Recovery Coaching and support for treatment entry
- Behavioral health support
- Health-related social needs case management (navigation support for medical benefits, primary care, employment, basic needs, etc.)
- Parenting and caregiver support services

Proposed Use of Settlement Funds

GFHC, in collaboration with our treatment provider partner, New Paths, Inc. are seeking \$500,000 in ongoing support from Michigan's State Opioid Settlement Funds to sustain and expand hospital-, community-, and jail-based peer recovery coaching services in Genesee County.

<u>Setting</u>	Role of Peer Recovery Coaches
Hospitals	Engage patients post-overdose in emergency rooms;
(Opioid Overdose Recovery Program)	connect to care
Community (Genesee County Quick Response Team)	Law Enforcement and EMS partnerships; Harm reduction distribution; Community education
County Jail	Engage pre-release individuals; Increase
(Reach, Inspire, Serve, Empower, or	connection/adherence to jail-based outpatient treatment;
R.I.S.E.)	ensure care continuity

Why It Matters

- This proposal aligns directly with the intended use of opioid settlement funds: building sustainable, community-based recovery infrastructure. The investment will complement existing Medicaid reimbursement and grant efforts, ensuring long-term impact.
- Peer recovery coaches are proven, cost-effective, and people-centered. With opioid settlement dollars, we have a timely opportunity to scale what works and save lives.

Impact:

- Increased recovery engagement and reduced relapse rates
- Lower hospital readmissions and ER visits
- **Reduced recidivism** for those involved in the justice system
- Cost savings through early intervention and reduced emergency care usage

Thank you!
