The MNRTF provides financial assistance to local units of government or qualifying nonprofits and to the Department of Natural Resources (DNR) for public acquisition of lands for resource protection and public outdoor recreation. Applications for assistance from the MNRTF are accepted annually, and recommendations are made by the MNRTF Board and submitted to the legislature for approval and appropriation of funds.

Before the MNRTF reached its constitutional cap of $500.0 million in 2011, the Michigan Constitution directed that the fund receive revenues from bonuses, rentals, delayed rentals, and royalties collected or reserved by the state under provisions of leases for extraction of nonrenewable resources from state-owned lands, except revenues accruing under leases of state-owned lands acquired with money from the state or federal Game and Fish Protection Funds or revenues accruing from lands purchased with such revenues. Additionally, the Michigan Constitution directed annual expenditures from the MNRTF to consist of interest and earnings on the principal and up to 33-1/3% of fund revenue received in the previous fiscal year.

Since reaching the $500.0 million cap in 2011, the MNRTF is no longer eligible to receive annual revenues from bonuses, rentals, delayed rentals, and royalties. These revenues are now deposited to the Michigan State Parks Endowment Fund (MSPEF) until the fund balance reaches $800.0 million, after which revenues will again be credited to the MNRTF. The current balance of the MSPEF is $350.0 million. Annual expenditures from the MNRTF are limited to interest and investment earnings of the principal, and funding carried forward from previous years. *[continued on next page]*
